第57届中国（广州）国际家具博览会
THE 57th
CHINA INTERNATIONAL
FURNITURE FAIR(GUANGZHOU)

FOREWORD

Dear exhibitors,

Thanks for attending The 57th China International Furniture Fair (Guangzhou) (CIFF), which will be held at the China Import & Export Fair Complex. The CIFF takes place in two phases. The first phase is scheduled from March 18th to 21st, 2026, offering the home furniture, home textile and decorative items(Soft Decoration Aesthetic Design Exhibition),outdoor furniture(outdoor furniture, shading system and leisure products exhibition).. The second phase is to be held from March 28th to 31st, 2026, specializing in the office furniture and facilities. It will be held concurrently with the China International Furniture Machinery & Furniture Raw Materials Fair (Guangzhou)/interzum guangzhou 2026.

In order to enable the exhibitors to obtain perfect and timely supporting services, to ensure that the exhibitors can successfully prepare and withdraw the exhibition during the exhibition, to ensure that the exhibition is held in good order and a complete success, this exhibition manual is specially compiled for the exhibitors' reference and compliance. The right of interpretation of the manual belongs to China Foreign Trade Guangzhou Exhibition Co., LTD.

Please read through this Service Manual carefully, so that you can be familiar with the process of preparation and withdrawal, and make preparations for the exhibition in advance.

If you need more detailed information or further assistance, please contact the relevant contractor, transport, exhibition agent or China Foreign Trade Guangzhou Exhibition Co., LTD. During the exhibition period, please contact the conference on-site service points.

Wish your company great success!

The 57th China International Furniture Fair (Guangzhou)

December, 2025

Flow Chart of Participation for Exhibitors

| Procedure | Remark |
|---|---|
| Apply for a booth. | Visit our official website: www.ciff-gz.com to download the application forms and fax or email the completed application forms together with your business licenses to our relevant contact persons. |
| Confirm the booth after paying the deposit. | Among them, the standard booth must pay the full booth fee in one lump sum. |
| Receive the relevant information for participation. | The host will send Vehicle Badges, Invitations and Booth Confirmation by courier. |
| Transport the exhibits. | Refer to the <i>Exhibitor Manual</i> . |
| Construct the booth.(Raw Space, Standard Booth) | Submit the drawing verification information and Application for Use of Electricity to the official contractors according to the requirements of the <i>Exhibitor Manual</i> . |
| Pay the balance for booth. | |
| Receive the badges for admission (Exhibition Preparation Badge, Exhibitor Badge). | Submit the information such as the Receipt for Raw Space Construction Management Fees and apply for the Exhibition Preparation Badge according to the requirements of the <i>Exhibitor Manual</i> . |
| Arrange booth and put exhibits in place. | |
| Attend the exhibition. | On-site Talks. Intellectual Property Protection. |
| Move Out. | Refer to the <i>Exhibitor Manual</i> for the specific move-out schedule. Exhibition sample return service,Contact the main carrier of the Guangzhou Home Expo. |
| Receive the Exhibit/Sample Release Slip. | |
| Move out the exhibits, samples and display racks. | |

| No. | Description | Received by | Deadline | Page |

| A3 | Hotel accommodation (to be returned when required) | Hotel Check-in | Subject to the date specified by the hotel | 93 |

All forms must be returned by the required date to ensure timely processing. Forms submitted beyond the deadline will not be accepted and all consequences or costs arising therefrom will be the sole responsibility of the exhibitor.

Special Tips

- ★ The fascia writing will be produced according to the Chinese and English names in the Exhibition Confirmation Form. In case of any changes, exhibitors shall contact the official contractor by themselves.
- ★ All the constructors that undertake the raw space construction are required to apply for the raw space constructor qualification certification of China Foreign Trade Guangzhou Exhibition General Corporation. Please visit www.cfte.com or www.ciff-gz.com for detailed information.
- ★ All contractors are required to purchase exhibition liability insurance or similar insurance, see page 27 for details.
- ★ Please pay attention to the time change and carry out the preparation and dismantling work on time, the specific time of the preparation and dismantling of the exhibition can be found in the basic information of the exhibition (pages 15-30) and the must-read (pages 31-43).
- ★ All special decoration construction units shall pay the special booth construction management fee according to the standard of Poly World Trade Center Exhibition Hall: RMB 20 per square meter for single-story special booths and RMB 25 per square meter for double-story special booths. The fee shall be fully collected by the official main contractor and remitted to the exhibition hall..
- ★ Strictly comply with the fair's safety and fire management regulations and booth construction requirements. For units that violate the regulations, the organizing committee will deduct the construction security deposit in accordance with the "Exhibition Construction Management Penalty Regulations"..
- ★ Exhibition badges can be processed at designated locations from March 14 to 17 (see Fair Basic Information for details).
- ★ During the fair, no fashion shows or similar activities are allowed inside or around the booth. The volume of audio promotions and performances in the booth shall not exceed 60 decibels.
- ★ The vehicle permits for exhibition preparation and dismantling have been adjusted this year, including exhibit vehicle permits and construction vehicle permits (one permit per vehicle). Please refer to the instructions on the permit for details.
- ★ Precautions for on-site security:
 1. In order to prevent accidents, all exhibitors must take care of their personal belongings and exhibits. Computer lock service is provided free of charge in each exhibition hall, and exhibitors with computers should contact the security office of the museum.
 2. The security personnel of each exhibitor's booth must obey the management of the conference, and shall not hinder the on-site safety and fire management personnel of the conference from entering the booth for inspection.
- ★ Special precautions for exhibition dismantling and booth decoration:
 1. For valid preparation/dismantling vehicle permits: Medium-sized trucks with a load capacity of 0.6-4.99 tons have a free unloading time of 2 hours; an additional fee of RMB 50 per hour will be charged for overtime.
 2. Large trucks with a load capacity of 5 tons or more have a free unloading time of 3 hours; an additional fee of RMB 50 per hour will be charged for overtime.
- ★ Visitors who pre-register for this furniture fair can enter the exhibition directly with their second-generation ID cards.

Notice on the Implementation of the New Badge Application Regulations for Daily Exhibitions at the China Import & Export Fair Complex

All exhibitors and constructors:

In order to purify the exhibition environment of the Canton Fair Complex, strengthen the safe production of daily exhibition preparation and dismantling construction, and meet the requirements of the traffic police department that trucks must make an appointment to enter the Pazhou area, the Canton Fair Complex (ABCD area) began to implement the real-name system for the preparation and dismantling of exhibition personnel and trucks, and the appointment of certificates and truck timing inspection for daily exhibitions. The relevant certification process and fee standards are hereby notified as follows:

I. Types of Badges, Charging Rates and Validity Period

(I) Prepare for the removal of truck documents

1. Target users: Freight vehicles that transport materials, exhibits and equipment in and out of the exhibition hall during the preparation and dismantling of the exhibition.
2. Charging standard: 50 yuan per car per certificate, 300 yuan deposit.
3. Validity period of the certificate and the return of the deposit: the vehicle is regarded as a validity period once after the entry and exit verification timing point on the date of use of the license (a car license can only enter and exit once), and the free stay time of the current entry is 150 minutes, and the overtime fee is deducted from the deposit (50 yuan will be deducted for every more than half an hour, and less than half an hour will be calculated as half an hour). Missing entry or exit timing information may result in the full amount of the deposit being forfeited. Please be sure to remind truck drivers to check whether the information has been entered through the timing start and timing end points, and to follow the designated route (on the back of the witness).

(II) Preparation for the removal of the construction personnel pass (if the exhibitor enters the exhibition only for inspection and does not need construction, this certificate is not required)

1. Target users: During the preparation and dismantling of the exhibition, those who need to enter the hall to engage in booth installation, cargo transportation/loading and unloading, equipment installation, etc., must apply for a pass.
2. Charging standard: 40 yuan per certificate (10 yuan for personal accident insurance).
3. Validity period of the certificate: The pass is valid during the exhibition preparation and dismantling period indicated in the certificate, and there is no need to apply for the certificate repeatedly. For exhibitions held in phases, certificates are required for each period.

II. Process for Badge Application

(I) Exhibitors need to apply for truck documents in advance to avoid affecting the efficiency of the exhibition. Daily exhibition planning and removal of exhibition personnel and vehicle certification process (exhibitor version), click to download:

<https://www.ciff-gz.com/pdf?link=https%3A%2F%2Foss.ciff-gz.com%2Fpdf%2F92043051aae336622bc17daf4321d2de.docx>

(II) The process of applying for the license of the personnel and vehicles for the daily exhibition preparation and dismantling (construction unit), click to download:

https://www.ciff-gz.com/pdf?link=https%3A%2F%2Foss.ciff-gz.com%2Fpdf%2F2025%2F12%2F29%2F1766991064_vO6kjz.docx

After applying, reviewing and completing the payment of personnel or vehicle documents, if you need express mailing service, you can fill in the recipient's name, telephone number, detailed receiving address, etc. in the system to complete the mailing application, and the postage will be paid.

III. Establishment of Badge Service Centers

The China Import & Export Fair Complex will set up the badge service centers to provide services for all entities of daily exhibitions. Given below are the specific locations:

1. Area A: Counters 6-1 & 6-2, Pearl River Promenade.
2. Area B: Badge Service Center on Zhanchang Road East, Exit A of Pazhou Metro Station (Registration Office for Overseas Buyers of Canton Fair).
3. Area C: Hall 16.1, Exit C of Pazhou Metro Station (Registration Office for Overseas Buyers of Canton Fair).
4. Area D: Counters 17-2 & 17-3, Pearl River Promenade.

IV. Badge Service Time

Starting 10 days before entering the venue, 9:00-18:00 each day.

V. Traffic hours and road sections of the exhibition trucks

(I) Traffic hours:

1. From 22:00 in the evening before the day of arrival to 7:00 in the day of arrival and from 9:00 to 15:00 every day during the day of arrival.
2. From 22:00 in the evening before the day of the withdrawal to 7:00 in the day of the withdrawal and from 16:00-22:00 every day during the withdrawal.

(II) Road section:

During the above time period, trucks that have applied for the arrival and withdrawal of the exhibition permit are allowed to enter and exit the exhibition hall at Xinhua Express Exit to the east of Xingang East Road, Xingang East Road (Xinzhou Wharf to Modiesha Road), Yuejiang Road (Huizhan East Road to Modiesha Road), Modiesha Road, Huizhan East Road, Nanfeng East Road, Fengpu Middle Road (Keyun Road to South China Expressway Section), and Huizhan South 1st Road.

Note: Consultation telephone number of the certificate making center:

89131079 in Area A; 89130186 in Area B ;89071064 in Area C; 89133628 in Area D .

The 57th China International Furniture Fair (Guangzhou)
December, 2025

The Initiative on “Green Exhibition”

-----Create a Green Exhibition, Implement Green Development

All Exhibitors and Builders:

In order to thoroughly implement the spirit of the 20th National Congress of the Communist Party of China, further promote the green, recycling, and low-carbon development of the exhibition, improve the utilization and regeneration of resources, continuously accelerate the pace of green environmental protection, and move towards the goal of "green exhibition".

(I) Green Move-in

Exhibitors use non-toxic, harmless, recyclable environmental protection materials, and the main frame is made of profiles (steel structure, aluminum profile); No special plate waste will be generated; No paint and plastering are used; The booth lighting fixtures use environmentally friendly and energy-saving lamps.

(II) Green Participation

1. Exhibitors are encouraged to use exhibitors and equipment that meet national environmental protection standards to achieve green exhibitions.
2. Encourage exhibitors to use recyclable or degradable packaging materials to reduce the impact on the environment.
3. Exhibitors are encouraged to take public transportation as much as possible to participate in the exhibition to achieve green travel.
4. Control lighting, noise and other pollution during the exhibition to create a comfortable negotiation environment.
5. Implement garbage classification and recycling to reduce the amount of garbage.

(III) Green Move-out

1. Abide by the laws and regulations on national safety production, strictly implement the operating procedures, and do not operate in violation of regulations; Ensure construction safety, do a good job in the personal safety protection of construction personnel, and prohibit barbaric construction.
2. Give priority to the recycling and utilization of degradable, recyclable, decomposable and other materials to reduce the generation of waste plates and garbage.

Note: The use of non-degradable plastic bags is prohibited during the exhibition.

Rules on Security Management for Exhibition

To strengthen the construction management for exhibition and guarantee the successful exhibition, the Rules are formulated. It is applicable to the related matters of exhibitors and their authorized construction companies in the course of move-in, move-out and booth management. Exhibitors shall take effective measures to ensure that their authorized construction companies abide by the Rules, make clear the management rights of the Organizer for the construction companies and their staff (hereinafter referred to as guarantee that the construction companies shall assume responsibilities for the Organizer in the course of move-in, move-out and booth management). The Official Contractor shall interpret the uncovered matters hereto.

I. Rules on Safety Construction

1. All construction units (including exhibitors who decorate and dismantle booths by themselves, the same below) must submit the "Safety Responsibility Letter" (see Page 53) signed and sealed by the exhibitor and the construction unit (if any) to the official main contractor for the record before entering the venue for construction.
2. All applications for raw space special decoration, design drawings, and "Safety Responsibility Letters" must be submitted to the official main contractor for preliminary review by February 21, 2026. Construction units that fail the drawing review will not be allowed to enter the venue for construction.
3. During the exhibition preparation and dismantling period, construction personnel must wear qualified safety helmets and safety ropes as required, and enter the construction site with valid certificates. The labor protection products worn by construction personnel must meet labor protection requirements.
4. Ladders and scaffolding used at the construction site must be firm, and joints must be rigidly anchored. Only qualified aluminum alloy scaffolding shall be used; unqualified iron scaffolding is prohibited. No objects shall be placed or personnel shall stand on the top of mobile climbing tools. Personnel entering the construction site must wear safety helmets as required. The use of A-frame ladders longer than 2 meters is prohibited. For high-altitude operations above 2 meters, scaffolding or other climbing facilities must be used, and personnel must be on standby for supervision during the operation. High-altitude operation personnel must correctly wear safety belts in accordance with the principle of "high hanging and low use".
5. Construction personnel are strictly prohibited from fighting, gambling, or other acts violating the "Public Security Administration Punishment Law" and "Criminal Law" in the exhibition hall. Once discovered, the organizing committee has the right to expel the person from the exhibition hall, confiscate their construction certificates, and refuse them re-entry for construction.
6. Professional construction personnel can only engage in construction within their own professional scope; cross-professional operations are strictly prohibited. Among them, electrical construction personnel must hold professional operation certificates issued by relevant national departments and wear them during electrical construction. If the construction unit needs to replace electrical construction personnel, it shall declare in advance and obtain relevant construction certificates before entering the venue for construction.
7. Construction units are not allowed to bring electric saws, cutting machines, welding machines, air compressors, etc., into the venue for operation without permission.
8. High-altitude operations must use qualified and safe lifting tools and operating platforms. When engaging in high-altitude operations, construction personnel must fasten safety belts and wear and use relevant labor protection products. The construction party shall set up a safety zone around the high-altitude operation area, place obvious warning signs, and assign special personnel to direct and supervise the work.
9. Construction units are strictly prohibited from hanging, binding, etc., using the venue structure without permission.
10. Decorations and booth backboards higher than adjacent booths must be aesthetically treated to maintain the overall beauty of the exhibition hall.
11. During the booth decoration and dismantling process, construction units shall not block fire-fighting facilities, occupy fire-fighting channels, emergency exits, or audience evacuation channels.
12. Construction units are strictly prohibited from using flammable, explosive, or other prohibited items during construction, and from conducting large-scale painting work in the exhibition hall. For booths requiring water and electricity installation, applications must be submitted in advance, and construction shall be carried out in accordance with the approved design plan. Unauthorized connection and overloaded connection of electrical equipment are strictly prohibited.
13. Materials used for booths shall be flame-retardant or fire-retardant materials that meet national temporary building material standards, and fire prevention treatment shall be carried out. High-

temperature light boxes and high-intensity lighting fixtures installed in the booth must be equipped with protective devices and reserved for heat dissipation space.

14. No open flame operations such as electric welding or gas welding are allowed in the exhibition hall.
15. Construction personnel's construction certificates shall not be altered, duplicated, or transferred. When entering or exiting the construction site, construction personnel shall obey the inspection of relevant personnel of the organizing committee.
16. Rough construction, illegal construction, unauthorized dismantling of booths, and early dismantling in violation of the organizer's regulations are strictly prohibited.
17. Damaging venue facilities or equipment, or changing their nature and location of use is strictly prohibited. Once discovered, penalties will be imposed according to the severity of the circumstances.
18. During the construction and exhibition period, if a fire breaks out, the project collapses, or other major property losses or personal injuries occur due to the reasons of the construction unit, the organizing committee will not only impose penalties in accordance with relevant regulations but also have the right to require the construction unit to compensate for the resulting losses, and cancel the on-site construction permission of the construction unit. If the circumstances are serious and criminal liability is involved, it shall be handed over to the judicial organ for handling.
19. If the booth breaks, tilts, collapses, or causes other major property losses or personal injuries due to construction reasons during the exhibition, the organizing committee will not only impose penalties in accordance with relevant regulations but also have the right to require the construction unit to compensate for the resulting losses, and cancel the on-site construction permission of the construction unit. If the circumstances are serious and criminal liability is involved, it shall be handed over to the judicial organ for handling.
20. The organizing committee strongly recommends that exhibitors or construction units purchase relevant insurance for their staff, construction personnel, exhibits, or other valuables to cover safety, theft, loss, damage, and fire risks.

II. Rules on Booth Cleaning:

1. During the booth dismantling period, construction units must clean up the decoration garbage of their own booths and shall not pile it up in the exhibition hall, exhibition hall stairwells, or exhibition hall unloading areas. If piling is found, the official main contractor will supervise the construction unit to clean it up. If the construction unit refuses to correct after persuasion, the security deposit will be deducted.
2. During the dismantling process, if special decoration components need to be transported by elevator, the components shall be designed according to the size of the freight elevator. The recommended size for elevators West 1, West 2, West 6, and West 7 is 3.5 meters in length, 2.5 meters in height, and 1.6 meters in width. The recommended size for elevators West 3 and West 8 is 5 meters in length, 2.5 meters in height, and 2.6 meters in width; they stop at Basement 1, Floor 1, Floor 2, and Floor 3.
3. Construction units must dismantle the booth and transport the decoration garbage within the specified time; otherwise, the security deposit will be deducted for delay.

III. Rules on Maintaining On-site Order of the Fair:

1. During the exhibition, the volume of audio promotions and performances on the exhibitor's booth shall not exceed 60 decibels. For violators who fail to make corrections after a reminder, the official main contractor of the organizing committee has the right to take temporary power cuts and order rectification.
2. During the exhibition, a certified electrician must be on duty at the booth. In case of power outages, sparks, or other electrical accidents caused by overloaded power consumption or improper use of electricity, the official main contractor of the organizing committee has the right to cut off the power supply of the booth and order rectification. For damages to venue facilities and equipment caused thereby, the organizing committee has the right to order compensation.
3. If water-using equipment is installed in the booth, it must be attended by special personnel. In case of water leakage, splashing, overflow, etc., caused by improper operation or negligence, resulting in water immersion of the carpet in the exhibition channel or damage to venue facilities and equipment, the organizing committee has the right to order compensation.
4. Exhibits, tools, packaging materials, etc., in the booth are strictly prohibited from being placed on the ceiling, back wall of the booth, or outside the booth, and shall not affect the exhibition image or block fire-fighting and exhibition hall channels.
5. The projected area of the booth structure is strictly prohibited from exceeding the leased area.
6. The highest point of the booth structure is strictly prohibited from exceeding the height limit (booth construction height limit: single-story booths up to 4.5 meters, double-story booths up to 6 meters).

Illustration: Booth area: 900mm x 900mm. The maximum height for construction on the first floor is 4,500mm (for double-layer construction, the maximum height is 6,000mm; the same applies). The shaded area within the diagram represents the correct construction zone. Anything outside this shaded area constitutes areas with excessive width and height.

IV. Rules on Application for Intellectual Property Rights

In order to protect intellectual property rights, encourage design innovation, maintain normal trading order, and protect the legitimate rights and interests of exhibitors and intellectual property rights holders. According to the relevant provisions of national laws, the exhibition will establish an intellectual property record and publicity system, all exhibitors are requested to provide copies of relevant supporting materials (including: certificate of rights, identity certificate of right holder or industrial and commercial registration certificate, certificate of legal status of rights, intellectual property license contract) for the exhibition projects involving intellectual property rights 30 days before the start of the exhibition, and please fill in the "intellectual property application form" and submit it to the organizer for publicity. Please refer to the official website for specific regulations and how to apply www.ciff-gz.com.

V. Rules on Quality Requirements for Safety Helmets and Correct Use by Construction Personnel

(I) About Quality Requirements for Safety Helmets:

The safety helmets shall pass the ISO9001:2000 Quality System Certification. Try to avoid high mass impact or puncture. The helmets are required to be replaced after suffering impact or puncture damage. Do not change their structures; or you have to bear all the consequences arising therefrom. No contact with paint, solvent, gasoline or similar substances. Use the neutral detergent or lukewarm water for washing.

(II) Rules on Correct Use of Safety Helmets by Construction Personnel

- (1) Adjust the adjustable bands behind the helmet to the proper position according to your head shape before wearing it. Fasten the elastic straps in the helmet. The degree of tightness of the inner cushion is adjusted by the straps. The vertical distance from your head to the top of the helmet shall be between 25 ~ 50mm and not less than 32mm so that the helmet can have enough space to cushion in case of impact and help ventilation between your head and the helmet.
- (2) Do not have your helmet on crooked. Do not put the brim behind on the back of your head, or its protection against impact will be reduced.
- (3) The lower strap of the helmet must be fastened securely under your jaw. The degree of tightness shall be proper to prevent the helmet from being blown away by the wind or from being knocked by other impediment or from coming off due to your head turning up and down.
- (4) The top of the helmet is provided with harness inside. Some have a small vent for ventilation. Do not make an opening in use for ventilation, which will reduce the strength of the helmet.
- (5) The helmets will gradually be damaged in the process of use. Check regularly whether there are chaps, depression, cracks or wear & tear. Replace them if any abnormal phenomenon is found. Do not use them any more. The helmets that suffer any impact or cracks shall be discarded regardless of damage or not.
- (6) Do not use the helmets with only chin strap connected with shell, namely the helmets without inner cushion.
- (7) The construction personnel in the on-site operation are not allowed to take off their helmets, lay aside or use them as cushion.
- (8) Most helmets are made of high-density low-pressure polyethylene plastic and have the properties of hardening and deterioration. Do not expose them to the sun for a long time.

- (9) For the new helmets, first check whether they have the certificates for production permitted by the Labor Department and the certificates of quality, and then check any damage or uneven thickness or inner cushion, adjustable bands and elastic straps are complete and effective. Replace them immediately if they fall short of the requirements.
- (10) It is also required to wear the helmets for indoor operation on site. Wear them carefully especially for indoor live-wire operation because the helmets can prevent collision and provide insulation protection.
- (11) Keep the helmets clean in use. No contact with the source of fire. Do not paint them randomly. Do not use them as stool to prevent loss. In case of loss or damage, reissue or replace them immediately. Persons without helmets are not allowed to enter the construction site.

VI. Method of using safety rope

- (1) Each user uses a fixed set of safety rope.
- (2) Take some necessary preventive measures before each use, and ensure safe rescue if necessary.
- (3) The safety rope is only used by one person at a time, and the user should know how to use it.
- (4) Before each use, check the safety rope. If in doubt, replace the safety rope immediately. - During use, take all necessary measures to avoid damage to the equipment. - Avoid contact with sharp objects and corrosive substances.
- (5) A safety rope conforming to EN354 may be used in conjunction with a shock absorber provided that the total length of the connection to the fall safety belt (connected via a connector) does not exceed 2 metres.
- (6) If the safety rope is adjustable, check the position of the regulator regularly during use.
- (7) After a fall accident, the safety rope cannot continue to be used.
- (8) Do not replace the parts on the safety rope.
- (9) Choose an object with a high bearing capacity (at least 10kN). The support point should be above the user.
- (10) The safety rope without shock absorber is not used as an anti-fall system.

2. VENUE

China Import & Export Fair Complex

Add: No. 382, Yuejiang Zhong Road, Haizhu District, Guangzhou, China

Poly World Trade Center Expo

Add: No. 1000, Xingang Dong Road, Haizhu District, Guangzhou, China

3. EXHIBITION AREA ARRANGEMENT

Civilian Furniture Exhibition Area (Area A\B\C, Poly Plaza Exhibition Halls): Halls 1.1-5.1, Halls 1.2-5.2, Halls 9.2-13.2, Hall 9.3-11.3, Poly Plaza Exhibition Halls E1-E6, Halls 14.1-15.1, Halls 14.2-16.2, Halls 14.3-16.3, Halls 14.4-16.4, North exterior corridor.

Outdoor Living Exhibition Area (outdoor furniture, sunshade systems, and leisure products – Booth B): Halls 9.1-13.1, Tent Halls 10.0-11.0.

Jewelry and Home Textiles Exhibition Area (Soft Decoration Aesthetic Design Exhibition – Zone D): Halls 17.1-20.1 and Halls 18.2-20.2.

4. OPENING DATES & HOURS

Opening Dates: March 18-21, 2026

| Participants | Opening Hours |
|----------------------|---|
| Exhibitors | March 18-20, 2026: 08:30-18:00 March 21, 2026: 08:30-17:00 |
| Professional Visitor | March 18-20, 2026: 09:00-18:00 March 21, 2026: 09:00-17:00 |

5. MOVE-IN & MOVE-OUT SCHEDULE

- Processing of exhibition certificates: March 14-17, 2026, 09:00-24:00 (PWTC)
March 14-15, 2026, 09:00-17:00
March 16-17, 2026, 08:30-23:00
- Venue entry and booth arrangement (for exhibitors renting raw space booths):
March 14-17, 2026, 09:00-24:00 (PWTC)
March 14-15, 2026, 09:00-17:00
March 16-17, 2026, 08:30-23:00
- Exhibition goods entry and booth arrangement (for exhibitors renting standard booths):
March 16-17, 2026, 09:00-24:00 (PWTC)
March 16-17, 2026, 08:30-23:00
- Exhibition goods exit: March 21, 2026, 17:00 - March 22, 2026, 01:00
- Decoration materials exit: March 22, 2026, 09:00-17:00
- The early entry fee is 41 yuan per square meter per 8 hours (this rate applies if the exhibition hall has available slots). The starting booth area is 150 M2; if it is less than 150 M2, it is counted as 150 M2; and if it exceeds 150 M2, the actual area is charged.

7.Over Time (Charged)

If the exhibitor needs to extend the working hours, please go to the site office of the

contractor one hour before the exhibition closes to complete the overtime procedures. Otherwise, the exhibition will not be able to arrange the relevant personnel to work overtime. Overtime expenses shall be borne by the exhibitor.

Charge Rate:

Fee Standards

Application within the specified time: ¥4 per square meter per hour(During the move-in and move-out periods:

Minimum billing area: 100 square meters. Any booth with an area less than 100m² shall be charged as 100 m²; areas exceeding 100m² shall be calculated based on the actual net area.

Overtime: Minimum 3-hour charge. Any overtime less than 3 hours shall be billed as 3 hours; additional time beyond 3 hours shall be charged in 2-hour increments.

Overtime during the exhibition period shall be charged on an hourly basis.)

Late application: ¥5 per square meter per hour(During the move-in and move-out periods:

Minimum billing area: 100 square meters. Any booth with an area less than 100m² shall be charged as 100 m²; areas exceeding 100m² shall be calculated based on the actual net area.

Overtime: Minimum 3-hour charge. Any overtime less than 3 hours shall be billed as 3 hours; additional time beyond 3 hours shall be charged in 2-hour increments.

Overtime during the exhibition period shall be charged on an hourly basis.)

Exhibitors must complete the dismantling of their booths within the timeframe specified by the conference by March 22, 2026. The conference will not accept any requests for delayed dismantling. If an exhibitor is unable to remove their exhibits and decorative materials from the exhibition hall within the allotted time, the conference will dispatch removal personnel to assist the manufacturer in doing so, and the exhibitor will be responsible for the associated costs.

6. HOW TO GET TO THE VENUE

Poly World Trade Center Exhibition Hall is located at No. 1000 Xingang East Road, Haizhu District, Guangzhou. Exhibitors can reach the venue through the following routes:

a)Metro:

- Take Line 8 and get off at Pazhou Station. Exit from Exit C of Pazhou Station to directly reach the Dining & Living Room Zone.
- Take Line 1 to Gongyuanqian Station, transfer to Line 2 to Changgang Station, then transfer to Line 8 to Pazhou Station.
- Take Line 3 to Kecun Station, transfer to Line 8 to Pazhou Station.

b) By Car:

- Guangzhou Bridge - Xingang East Road
- Jiangwan Bridge - Xingang East Road
- Haiyin Bridge - Xingang East Road
- Huangpu Avenue - South China Expressway

*For details, see the "Traffic Guide" on Pages 104-106.

China Import & Export Fair Complex is situated at No. 382, Yuejiang Zhong Rd., Haizhu District, Guangzhou. Exhibitors can get to the venue by the following routes:

a)Take Metro Line 8 to Xingang East Exit A to reach Area A and D of the exhibition hall, to Pazhou Station Exit A/B to reach Area B of the exhibition hall, to Pazhou Station Exit C to reach Area C and Poly Complex (those who take Metro Line 1 can transfer to Line 2 at

Gongyuanqian Station and transfer to Line 8 at Changgang Station; Those who take Metro Line 3 can transfer to Line 8 at Kecun Station.

b) By car, you can choose to go to Xingang East Road via Guangzhou Bridge, Jiangwan Bridge, Haiyin Bridge, or Huangpu Avenue to South China Expressway or Pazhou Bridge (South China Expressway requires a fee, and the rest are free)

7. OFFICIAL BADGES

a. Type of official badges & instructions:

* Exhibitor badges:

Less than 60M² (including 60M²): 3 badges will be assigned to every 9M²,

More than 60M²: 21+one more badge every 30M² if the booth is over 60M².

* Contractor badges: (handled and produced by Canton Fair Exhibition Hall) for raw space exhibitors only.

* VIP badges: For distinguished guests specially invited by the organizer.

* Staff badges: For staff of the organizer.

* Professional Visitor badges: used by domestic/overseas visitors with business cards.

* General spectator: used by domestic/overseas visitors without business cards..

* Press badges: Specially invited media and journalists.

* Prepare and withdraw exhibition car permits badges: For the collection and withdrawal of vehicles used, is the collection and withdrawal of exhibition vehicles to transport exhibition racks, exhibits into the exhibition hall voucher (by the Canton Fair pavilion unified handling and production)

b. Official badge management & regulations:

* Before exhibitors register, each participant must complete online real-name registration.

* Exhibitors need to present the original booth confirmation (copy with official seal) and company name card to the exhibitor registration center (Counter 5-5 of Pearl River Promenade in Area A, counter 11-1 of Pearl River Promenade in Area B, Hall 16.1 of Area C, counter 20-1 of Pearl River Promenade in Area D) to get the paper certificate.

* During the exhibition, all personnel must present the second-generation ID card, wear the relevant paper certificate on the chest, and consciously cooperate with the security personnel to check, otherwise they are not allowed to enter the exhibition. All certificates are strictly prohibited to lend, sell, alter, offenders will be prosecuted.

* The exhibition car license must be completed in advance before the entrance and collected at the designated registration point.

c. Application and use of building permit:

In order to prevent miscellaneous personnel from entering the hall and ensure the good order of the exhibition site, the construction certificate is issued by the Canton Fair Pavilion, and the construction company is put on record, and the construction personnel's real name system is implemented:

* Before registration, each site construction personnel must complete online real-name registration.

* Paper certificates shall be used by special persons and shall not be borrowed or exchanged. If they flow into the hands of illegal persons and cause losses to the exhibition, they shall be held jointly and severally liable.

8. INVITATION FOR EXHIBITORS

The conference also provides merchants with more convenient ways to handle: online pre-registration and wechat pre-registration. Merchants can log in the official website of the Home Expo(www.ciff-gz.com) or follow the official wechat account of EXPO China (wechat ID: CIFF) to pre-register.

9. OFFICIAL HOTELS

The organizing committee provides designated hotel accommodation services for visitors to the fair. Visitors who book hotel rooms at the official recommended hotels can enjoy preferential prices agreed between the organizing committee and the hotels. Exhibitors or visitors can fill in the hotel accommodation Form A3 and fax it to each designated hotel.

10. ELECTRICAL SUPPLIES, INSTALLATION & REQUIREMENTS:

- a) Power supply: The conference provides basic exhibition hall lighting. The standard power supply is: three-phase five-wire system, 380 volts /220 volts (V) 50 Hertz (Hz), maximum load 100 amps, if there is a larger power demand, should be applied in advance.
- b) The power supply of the booth will be closed immediately after the end of the exhibition every day, if you need 24 hours of power supply or delayed power supply, please contact the contractor as soon as possible, at your own expense.
- c) In order to ensure safe power consumption and adequate power supply, all additional power supply and power consumption of electrical equipment must be reported to the conference contractor in advance and can be supplied only after its permission.
- d) Must be selected to meet the quality standards of relevant national products, its installation, wiring and demolition must be constructed and tested by certified technicians, and accept the supervision of relevant departments. During the normal power supply process, exhibitors have the obligation to maintain the exhibition hall's power distribution equipment.
- e) The wire must use ZR-BVV (refractory double plastic copper core wire) and sheathed wire. Do not use flowers and aluminum wires.
- f) Single-phase load more than 10A current, three-phase power supply design should be used, and three-phase average distribution of booth load.
- g) Metal protection pipe and metal components must be electrical jumper, and do safety grounding.
- h) Each electrical circuit must have a special protection ground wire, and may contact with the leakage of metal objects connected.
- i) Downlights, quartz lights to have asbestos pad protection; The advertising light box and lamp post shall have convection heat dissipation holes. Lamp rectifier and trigger must be selected fire department inspection products.
- j) Fluorescent lamp ballasts and daylight lamps must be separated and installed, not bundled together.
- k) The use of high-power heating lamps should be equipped with protective cover (such as 100W or more tungsten iodide lamp). It is forbidden to use high-power lamps above 500W.
- l) All exhibitors and construction units should pay attention to the electrical facilities of the exhibition hall, and are not allowed to pull randomly. Once found, they will be punished by power failure. The exhibitor shall be responsible for the compensation for the loss caused to the exhibition hall.
- m) The electrical appliances and lines, switches and other power distribution facilities in the booth, to consciously accept the assembly electrician inspection. Found hidden dangers, to cooperate with the rectification, shall not refuse to check or excuse not to rectify.
- n) The booth must have its own booth power control electrical box (secondary electrical box), equipped with safe and reliable air circuit breaker and leakage protector (30mA, operation time is less than 0.1S), installed in a safe, obvious, convenient operation and inspection position; In principle, the distribution box shall not be installed in a closed space. If it is required to be installed, the room shall not be locked and the door shall be marked with words such as "distribution room". The protection setting value of the total switch of the booth power control box should be lower than or equal to 80% of the protection setting value of the fixed power switch of the access exhibition hall to ensure the safe operation of the power supply system of the exhibition hall. If the booth switch protection setting value is not suitable, the Exhibitor or the construction contractor shall adjust the electricity consumption until this requirement is met; General lighting, mechanical power, frequency conversion equipment, thyristor control equipment, stage dimming equipment, amplification equipment and 24-hour electrical equipment should be set up according to the classification of independent circuits,

strictly prohibited to share the same circuit. For important electrical equipment and important occasions, power supply should be installed with one main and one standby double circuit.

- o) A socket can only be used for a power within 500 watts of the display equipment, it is strictly prohibited to use multi-purpose sockets, to prevent overload caused by short circuit.

11. FREIGHT / EXHIBITS TRANSPORTATION

- a) Except with special approval from the Host, no additional exhibits are allowed to enter the exhibition hall once the fair has opened. No exhibits are allowed to be taken away from the hall before the Fair ends.
- b) Exhibitors must obtain a move-out permission to move out their exhibits at the end of the fair. Exhibitors are requested to obtain Move-out passes with their business cards at the Official Contractor Office after 15:00 on March 21, 2026.
- c) Exhibitors can use the underground freight elevator to send their goods to the exhibition hall, also can use the trolley to transport the light goods to the booth.
- d) Exhibitors are not allowed to use their own mechanical freight vehicles such as hook trucks, boom trucks, forklifts, hydraulic trucks, iron wheel trolleys, etc. to transport heavy exhibits in the exhibition hall (if you need to transport heavy exhibits, please contact the conference carrier).

12. VENUE SPECIFICATION & EQUIPMENT:

Technical data for the exhibition hall. (PWTC)

| | |
|-----------------------------|--|
| Hall No. | E1, E3, E5, E2, E4, E6 |
| Main Entrance | East Side: 9m wide, 5m high; West Side: 11m wide, 5m high |
| Hall Dimensions | 144m × 79m |
| Maximum Construction Height | Single-story booths: 4.5m; Double-story booths: 6m |
| Floor Load Capacity | E1-E2: 5 tons/square meter; E3-E4, E5-E6: 1 ton/square meter |
| Power Supply Mode | Three-phase five-wire system 380V/220V/50Hz |
| Power Capacity | E1-E2: 2500kW/hall; E3-E4, E5-E6: 1500kW/hall |

| | |

13. Security guard

- Security at the venue will be arranged by the Organiser, with special security guards patrolling the venue 24 hours a day. The exhibition is covered by public liability insurance, and every effort will be made to ensure the safety of the venue and exhibits during the exhibition. However, the organizer will not be responsible for the injury of staff and the loss or damage of exhibits.
- The exhibition has a large flow of people, complex personnel, and theft incidents occur from time to time, so all exhibitors must pay attention to taking care of their personal belongings and exhibits.
- During the preparation and withdrawal period, exhibitors are responsible for the safety of their exhibits, and if necessary, exhibitors can hire individual guards to accompany them.
- If you spot any suspicious person, please notify the security guard immediately.
- After the exhibition, please do not leave valuables in the booth and ensure that all display cases are locked. It is the responsibility of the exhibitor to take good care of his valuables.

14. INSURANCE & LIABILITY

- During the exhibition, exhibition and withdrawal period, the exhibitor shall bear and be responsible for compensating the expenses or compensation claims caused by its related persons and shopping. So as to protect the interests of the organizers and venue leaders.
- All construction units must purchase exhibition liability insurance or similar insurance. Among them, the compensation limit for personal injury or death is not less than 2 million yuan/person, and the cumulative compensation limit for personal injury or death per accident is not less than 6 million yuan. The insured shall include on-site construction personnel of the construction unit and on-site staff of the exhibitor; The insurance coverage shall include the area of the booth and the surrounding area..**
- The Conference strongly recommends that all construction units purchase for their booths, including but not limited to public liability insurance, employer liability insurance, and project all insurance.
- Under the circumstances beyond the control of the organizer, the organizer shall not be responsible for the inability of the booth to be constructed, reconstructed or dismantled, or the inability of the exhibition center to provide a certain service, or any changes in regulations and codes due to any conditions.
- The organizer reserves the right to cancel the exhibition completely, cancel part of the exhibition or postpone the exhibition. The booth fee will be arranged according to the specific situation.

15. STAND CLEANING

The Host will arrange for the general cleaning of the exhibition premises and stands prior to the opening of the exhibition and daily thereafter. Exhibitors, forwarders and agents are responsible for removing packing materials, empty cartons, wooden crates, etc. before the exhibition opens daily. Extra removal charges will be incurred if the above items are discarded in any part of the exhibition hall.

16. SALES OF EXHIBITS & STORAGE

- a) Retail of exhibits at the fair is not allowed. Otherwise, the resulting industrial and commercial taxes and other responsibilities shall be borne by themselves.
- b) There is a warehouse for exhibitors to store items, please contact the designated freight forwarder directly for details

17. GENERAL REGULATIONS

- a) Exhibitors should consciously abide by the relevant national laws such as intellectual property rights and copyrights, and violators shall bear all responsibilities. For exhibits involving trademarks, patents and copyrights, exhibitors must obtain legal patent certificates or license contracts
- b) Without the approval of the Organiser, exhibitors are not allowed to distribute promotional materials unrelated to the exhibited products in the venue; All commercial or promotional activities of exhibitors are limited to their booths and must not be a nuisance to guests or other exhibitors.
- c) Non-exhibitors are strictly prohibited from engaging in any trading or promotional activities in the venue. If you become aware of such a situation, you are requested to inform the Conference in a timely manner.
- d) Photography or videography is strictly prohibited in the venue without permission. If necessary, exhibitors can place a "No Photography" sign in a conspicuous position in the booth.
- e) Exhibitors who need to conduct product demonstrations and performances in the booth must strictly comply with the relevant safety and fire regulations, and can do so with the approval of the relevant competent authorities. During the demonstration and performance, the sound effect shall not affect the negotiation of other exhibitors.
- f) Smoking is strictly prohibited in the exhibition hall, exhibitors should consciously protect the public facilities and fire-fighting equipment in the hall, cooperate with the conference to do a good job in fire safety, and strictly prohibit the random movement of fire-fighting facilities and fire safety signs on the ground.
- g) All exhibitors should strictly abide by the fire safety regulations and take all fire prevention measures to ensure the safety of the public.
- h) Please do not post notices with discriminatory or racial language on the booth, and the Organiser reserves the right to ask exhibitors to remove the notices immediately if they are found or complained. Do not post "refuse domestic sales", "refuse to go with peers" and other words in the booth to refuse guests to visit, should use polite words such as "make an appointment to visit" to arrange buyers to visit, please treat all guests equally, and receive domestic and foreign merchants in a civilized way.
- i) If the exhibitor fails to register 24 hours before the opening of the exhibition and does not give any explanation, the organizer has the right to arrange the booth for other use, and the paid fee will not be refunded.

Chapter 2 Notices

Move-in & Move-out Notice

● Move-in (March 14-17,2026)

1. Certificate processing and exhibition preparation time:
March 14-17, 2026, 09:30-24:00(PWTC)
March 14-15, 2026, 09:00-17:00
March 16-17, 2026, 08:30-23:00
2. Upon submitting the relevant fees, exhibitors can obtain their exhibition badges at the exhibition registration desk by presenting the original or a copy of the booth confirmation form (signed with the company's official seal) and their company business card.
3. Strictly comply with the requirements of the "Ten Fire Safety Regulations for Exhibition Halls" and make all preparations for the exhibition.
4. Consciously protect the public facilities and fire-fighting equipment in the exhibition hall. It is strictly prohibited to arbitrarily move fire-fighting equipment or damage the fire safety evacuation signs on the ground; violators will be fined.
5. Exhibitors are requested to design the booth into modular assembly for on-site installation in advance, which is time-saving, safe, and efficient. On-site sawing and nailing of materials are not recommended.
6. Distribution and jurisdiction of exhibitor registration desks: (For specific locations, see the attached map on Page 108)
Exhibitor Registration Desk:
 - a. Exhibitor Registration Counter in Pearl Promenade of **Area A**: Counter 5-5
 - b. Exhibitor Registration Counter in Pearl Promenade of **Area B**: Counter 11-2
 - c. Exhibitor Registration Counter of **Area C**: 16.1 hall
 - d. Exhibitor Registration Counter in Pearl Promenade of **Area D**: Counter 20-1
 - e. East counter on the first floor of Poly World Trade Center Exhibition Hall (next to the main entrance of Hall E1).
7. On-site office locations of official main service providers:
 - 1) On-site Office of Official Main Contractor: East counter on the first floor of Poly World Trade Center Exhibition Hall (next to the main entrance of Hall E2); Counter 2-1 & 2-2 at Pearl Promenade, Area A;
Counter 12-2 at Pearl Promenade, Area B; Central Platform between Hall 15.3 and Hall 16.3, Area C;
Counter 19-6 at Pearl Promenade, Area D;
 - 2) On-site Office of Official Main Logistics Provider: East counter on the first floor of Poly World Trade Center Exhibition Hall (next to the main entrance of Hall E2); Counter 2-5 at Pearl Promenade, Area A; Counter 12-1 at Pearl Promenade, Area B; Central Platform between Hall 15.3 and Hall 16.3, Area C.
Counter 20-2 at Pearl Promenade, Area D;
8. On-site storage services are available, and the cost shall be borne by the exhibitor. (For details, please contact the official main logistics provider.)
9. Vehicles must travel and queue for dispatch in accordance with the schematic diagram on the back of the "exhibition preparation (dismantling) vehicle permit". If there are changes, follow the on-site notice and arrangement.

● Move-out (March 21-22,2026)

1. Dismantling starts at 17:00 on March 21, 2026. Dismantling time arrangement:
 - 1) March 21, 2026: 17:00 - March 22, 2026, 01:00

2) March 22, 2026: 09:00-17:00

2. Packaging materials for all exhibition goods can be transported into the exhibition hall from 17:00 on March 21. Packaging materials stored in the warehouse can be transported with the assistance of the official main logistics provider.
3. All exhibition goods must be released after verification by the security guard with the "Exhibition Goods Release Form". Exhibitors can collect the exhibition goods release form at the on-site office of the corresponding official main contractor.
4. Sold exhibition samples can be taken out of the exhibition hall after 17:00 on March 21 with the sales invoice or receipt.
5. Vehicles must follow the dispatch of on-site command personnel, travel normally, and queue for waiting.

Move-out Notice

I.All vehicles must enter the venue by passes during the move-out period and are not allowed to enter the Complex 30 minutes before the end of the specified move-out time. Vehicles shall go, queue up and wait for further instructions according to the guidelines printed on the reverse side of the Manual and are not allowed to be parked in any other places. For the vehicles that arrive early and fail to wait in the staging area according to regulation or are parked outside the staging area, our staff is entitled to instruct the drivers to drive back to the staging area and re-queue up. Those who fail to follow the instructions shall be treated by traffic police. Exhibitors should note that the vehicles to enter the truck lanes on the 2F and 3F shall not exceed 10 meters (inclusive) in length according to regulations of the Complex.

II.Exhibitors shall increase and provide sufficient manpower during the move-out period. Move-out must be completed in the time arranged by the Organizer. Overtime application is not allowed. To reserve space for vehicle dispatch, no exhibits or decoration materials are allowed to be piled around the entrances/exits on the south and north sides of the Complex.

III.From 17:00 on the closing day (March 21), exhibitors can pull the packaging of the exhibits to the booth with a cart for packaging, and the packaging for storage can also be transported by the home carrier, but it is not allowed to be carried into the museum by vehicle. The "Exhibit release Slip" will be collected from the designated home contractor of the conference from 15:00 on the same day, and all exhibits must be checked by the guard before they can be released.

IV.Waste clean-up and dismantling standard booths & all electrical equipment will start from 17:00 on March 21. Exhibitors must complete clearance in the specified time on March 22.

V.The trucks with a carrying capacity less than one ton (exclusive) are not allowed to enter the 2F and 3F for handling. The non-trucks or the trucks less than one ton (exclusive) may enter from the P1 underground parking garage to transport goods. When using the elevators to transport and handle goods, the drivers shall not leave their cabs so as to leave on schedule and follow the temporary parking space allocation.

VI During the move-out period, exhibitors shall designate special personnel in charge of looking after valuables, exhibits or decoration materials and of commanding the dismantling work. Split disassembly shall be used if the display racks with larger areas or higher walls are dismantled. The tall and big display racks may be dismantled in batches. The dismantling area shall not exceed the booth area. Do not push the walls to the adjacent booths to cause safety accidents. Exhibits, decoration materials and tools are not allowed to be piled on the passage to cause blockage and affect move-out.

VII Exhibitors must dismantle, clean up and carry away the display racks, exhibits and decoration materials. If an exhibitor fails to clean up on schedule or piles the decoration materials on the passage or the road, the Organizer will clean up, and the exhibitor shall pay the clean-up fees and be penalized according to the degree that affects the move-out. The penalty and clearance fees shall be deducted from the clearance deposit. The exhibitor shall pay the shortage separately.

VIII Since the cargo transport passages on the 2F and 3F are too narrow to park more vehicles, please follow the direction of our staff. The handling time of vehicles on the 2F shall not exceed 1.5 hours. The violators shall be forced to leave. During the move-out period, all vehicle passes are required to be put in the obvious places of cabs for inspection. Vehicles without passes are not allowed to enter the handling areas. Please be noted that the exhibitor related personnel shall take care of the passes and no vehicles are allowed through without passes. Passes may be obtained at the place designated by the Organizer in case of loss or missing. (Deposit is required.)

IX Exhibitors and their commissioned builders are requested to strictly comply with the relevant regulations of the conference. All vehicles must drive and wait in accordance with the routes specified on the "Vehicle Driving Route and Parking Position Map" on the back of their vehicle license, and follow the instructions of the traffic police and the traffic command staff of the exhibition hall. Otherwise, the consequences of the delay shall be borne by the exhibitor. Exhibitors can visit the official website of the exhibition (www.ciff-gz.com) to view the "Driving routes and parking Arrangements Map" and related regulations.

Thank you for your cooperation!

Note: The above arrangement is subject to the actual arrangement of the exhibition site.

Suspension Service Description of Poly World Trade Center Exhibition Hall

| Service Item | Price |
|---|--|
| Special Suspension Point Service (for booth structure hoisting) | RMB 2000 per point per exhibition period |

Special Suspension Point Service Application Form

| | |
|-----------------------|------------|
| Quantity | Location |
| Purpose | Weight |
| Hanging Item Material | Dimensions |
| Suspension Time | - |

1. For the special suspension point service, the maximum bearing capacity of each suspension point is 250 kilograms. For independent structure hoisting, manual or electric hoists must be used.
2. The lifting equipment used during the suspension process must be operated by trained personnel designated by the venue. The production unit shall cooperate with the installation on-site.
3. Requests for suspension services must be submitted to the official main contractor by March 5. Applications submitted and paid within this period will be charged according to the above standards; a 30% late service fee will be added for applications beyond the deadline; the venue does not guarantee the provision of services for applications submitted after the exhibition entry.

Ten regulations on safety and fire prevention of the exhibition hall

All exhibitors, contractors and staff must comply with the Fire Protection Law of the People's Republic of China and the relevant fire safety regulations of the exhibition hall.

- 1.Smoking is strictly prohibited in the exhibition hall. Violators will be severely punished depending on the circumstances.
- 2.Keep the passage unblocked, and the width of the main passage shall not be less than 6 meters. The evacuation door should be opened and unblocked, and should not be locked. It is strictly forbidden to arrange and display samples in the front room of the passage and the building (electric) elevator, and the offender will be ordered to dismantle it.
- 3.It is strictly forbidden to connect or pull wires (including lighting and advertising lighting). If you really need to install, you must declare to the contractor of the conference in advance, and the electrician must hold a certificate to work after the review and approval of the conference. The installation materials must be qualified products, and the exhibitor shall be responsible for accidents and disputes caused by the use of substandard products in violation of the regulations. During installation, flame-retardant wires should be used and electricity safety regulations should be observed, and power supply can only be used after passing the experience and inspection.
- 4.To decorate the exhibition hall by yourself, set up booths, booths (racks), billboards (racks), and grilles (scaffolding), etc., you must declare to the contractor of the conference in advance. Construction can only be carried out after approval, and the decoration materials should use flame-retardant plywood or non-combustible materials, otherwise they will be regarded as violations and ordered to be demolished.
- 5.In the construction, decoration and exhibition arrangement, fire hydrants and other fire-fighting facilities shall not be blocked, embezzled, encircled, or damaged, and the decoration frame and the top of the booth shall not be covered in any form, so as not to block the function of the fire sprinkler and smoke detector.
- 6.It is strictly forbidden to use electric stoves, electric kettles, electric irons, iodine-tungsten lamps, neon lamps and other electric heating appliances and high-power lamps in the exhibition hall.
- 7.It is strictly forbidden to bring toxic or dangerous goods into the exhibition hall. Such as: fireworks, firecrackers, gasoline, Tianna water, alcohol, gas, hydrogen, oxygen and dangerous and highly toxic chemical products, etc., such exhibition samples are only allowed to use substitutes.
- 8.The packing boxes, sundries, paper scraps and excess exhibition samples of the exhibitor samples must be cleaned up and transported out of the compound in time, and it is strictly forbidden to store them in the booth, on the top of the counter and on the back of the board wall. Violators are punished and ordered to clean up.
- 9.Conscientiously do a good job of clearing the site to ensure safety after shift. The key points are:
 - (1) cleaning up flammable debris, fires and other hazards.
 - (2) Cut off the power supply.
 - (3) Close doors and windows.
- 10.Open flames are not allowed to be used during construction and performance in the exhibition venue. Violators will be held responsible.

All exhibitors are requested to pay attention to the above regulations and strictly implement them, and if there is any violation, they will be investigated for economic and legal responsibility.

Responsibilities for Management of Electricity Use

I. Exhibitor's Responsibilities

- (I)Responsible for the safety of electricity consumption during the exhibition construction and exhibition;
- (II)Urge the commissioned booth contractor to comply with these regulations and implement the work of electricity safety;
- (III)Urge the commissioned booth contractor to implement the rectification requirements put forward by the exhibition hall to eliminate security risks;
- (IV)Together with the commissioned booth contractor sign and submit the "Exhibition safety electricity

II. Contractor's Responsibilities

(I)Official Contractor's Responsibilities

1. The official contractors, authorized by the host (organizer) to manage the electricity use for the exhibition, shall be responsible for the safety of all electrical facilities and lines installed in the venue. The main person in charge shall assume direct responsibility for on- site electrical safety. The official contractors are entitled to exercise the compulsory management means for unsafe behaviors in the area under their jurisdiction.
2. To strictly implement the relevant national fire code, electrical design and installation/construction specifications, regulations and standards, control the on-site electricity use in an all-round way and standardize the exhibition construction and management of electrical safety.
3. To assist the host/organizer in managing the on-site electrical safety, clarify the person in charge of on-site electrical safety, implement the safety work plan and electrical safety management measures and guarantee the safety of all on-site electrical lines and electrical equipment installed.
4. To be responsible for electrical safety patrol during the move-in, move-out and exhibition, participate in booth construction acceptance, eliminate the potential hazards in electrical safety, implement the relevant correction measures and assume direct responsibility for safety of electrical equipment installed.
5. To implement the suggestions for correction made by the Complex and subject themselves to the safety inspection by the Complex.

(II)Booth Contractor's Responsibilities

1. The booth contractors, as the electrical installation organizations for booths authorized by exhibitors, shall be responsible for electrical safety for booth construction during the move-in construction and exhibition.
2. To strictly implement the relevant national fire code, electrical design and installation/construction specifications, regulations and standards, control the on-site electricity use in an all-round way and standardize the exhibition construction and management of electrical safety.
3. To assist the host (organizer) in managing the on-site electrical safety, clarify the person in charge of on-site electrical safety, implement the safety work plan and electrical safety management measures and guarantee the safety of all on-site electrical lines and electrical equipment installed.
4. To be responsible for electrical safety patrol during the move-in, move-out and exhibition, participate in booth construction acceptance, eliminate the potential hazards in electrical safety, implement the relevant correction measures and assume direct responsibility for safety of electrical equipment installed.
5. To implement the suggestions for correction made by the Complex and subject themselves to the safety inspection by the Complex..

Interim Provisions on the Protection of Intellectual Property Rights

In order to strengthen the protection of intellectual property rights during the exhibition, encourage design innovation, standardize the market order, and establish a good image of the exhibition in the protection of intellectual property rights, the exhibition makes the following provisions on the protection of intellectual property rights during the exhibition:

1. Exhibitors should consciously abide by China's laws and regulations on intellectual property protection and the relevant regulations of the conference on exhibits (including but not limited to exhibits posted and placed in the booth, promotional pictures, materials and unopened box items) and intellectual property management, and cooperate with the protection of intellectual property rights in the exhibition.
 2. Exhibitors shall strictly review the intellectual property status of exhibits and prohibit the display of exhibits or promotional materials that infringe on the intellectual property rights of others. Without the permission of the intellectual property rights holder, exhibitors are not allowed to exhibit, quote or trade with products for which others enjoy intellectual property rights.
 3. If the exhibitor has the intellectual property rights of its exhibits, exhibit packaging, promotional materials and any display parts of the booth or is legally authorized, the exhibitor shall fill in the "Exhibitor Intellectual Property Information Filing Form" 30 days before the opening date of the exhibition, and provide a legal and valid certificate of intellectual property ownership to the exhibition organizer for filing and publicity. If the exhibitor fails to submit the intellectual property rights for the record, it will not affect the handling of complaints during the exhibition.
 4. The organizer of the exhibition will strengthen on-site supervision, strictly review the status of exhibits, exhibition boards, and related promotional materials during the preparation and exhibition, and have the right to request rectification if suspected infringement is found, and will report to the relevant management department in a timely manner.
 5. The complainant must provide a guarantee to the exhibition organizer, and if the malicious complaint causes losses to the exhibition organizer or the respondent, the complainant shall bear the corresponding legal responsibility to the organizer and/or the respondent.
 6. The complained exhibitor and its exhibitors must actively cooperate with the inspection work of the intellectual property management department or the on-site office to ensure the smooth progress of the exhibition. In the performance of their duties, the intellectual property management department and the conference may request the cooperation and assistance of the public security and exhibition hall security personnel.
 7. The Intellectual Property Office (hereinafter referred to as the "On-site Office") is set up at the exhibition site, which is composed of the exhibition organizer and its hired professionals and local intellectual property management departments, and is the only institution at the exhibition site to accept complaints of suspected intellectual property infringement in the exhibition hall during the current exhibition.
 8. Conditions for accepting intellectual property infringement disputes in the on-site office
- If the following conditions are met, the on-site office shall accept complaints or requests for handling complaints of infringement of intellectual property rights:
- (1) According to laws and regulations, the identity of the complainant shall be the owner of the intellectual property rights or the licensee of the intellectual property rights with independent claims or the legal successor of the intellectual property rights;

- (2) If a foreigner or foreign enterprise who does not have a habitual residence or business office in China complains about infringement, it shall entrust an agency established in accordance with the law in China to handle it;
- (3) There is a clear respondent;
- (4) There are clear matters of request, specific facts and reasons;
- (5) The parties did not file a lawsuit with the people's court for the dispute.

➤ In any of the following circumstances, the on-site office will not accept complaints or requests for handling complaints of infringement of intellectual property rights:

- (1) The parties have initiated legal proceedings with a people's court.
- (2) The parties have filed a complaint with the IPR administrative authority.
- (3) The patent right is under the invalidation procedure.
- (4) There is a dispute over the ownership of the trademark right or patent right, which is under the trial procedure of a people's court or the mediation procedure of the patent administrative authority.
- (5) The registered trademark is under the revocation or invalidation procedure.
- (6) The registered trademark has been revoked or declared invalid and is under the review procedure or the trial procedure of a people's court.
- (7) Cases that can only be governed and handled by specialized authorities, or disputes prohibited by laws and regulations from being resolved through people's mediation.
- (8) Repeat complaints filed by the same complainant against the same respondent for the same IPR.
- (9) Cases involving internal structures of large mechanical equipment, precision instruments, product manufacturing methods, etc., which are difficult to determine on-site.
- (10) Other cases that are not suitable for mediation by the on-site office.

9. Handling of suspected infringement of intellectual property rights

- (1) Participants with valid certificates to participate in this exhibition can complain to the on-site office (or the local intellectual property office) if they find that the exhibits, promotional materials and part of the display displayed in the booth are suspected of infringement in the exhibition hall. The on-site office does not accept other forms of complaints, such as phone calls and e-mails.
- (2) When complaining a complaint, the complainant shall first present to the office staff proof of identity (the identity certificate of a natural person, a copy of the registration certificate of a legal person or other organization with an official seal, and the identity document of its legal representative or person in charge), proof of rights (including a certificate of rights, proof of legal status of rights, or proof of legal inheritance of intellectual property rights), and authorization materials (power of attorney, identity certificate of the agent).
- (3) If a utility model patent or a design patent is involved, the on-site office may require the complainant to submit a patent evaluation report issued by the patent administration department under the State Council.
- (4) For complaints about alleged infringement of the internal structure of the product and the manufacturing method of the product, the on-site office may require the complainant to submit further evidence to prove the alleged infringement in addition to the required complaint materials.
- (5) After the above-mentioned relevant documents have been verified and valid by the staff, the complainant shall fill in the "Complaint Request Form" as required.
- (6) After receiving the Complaint Request and relevant supporting materials, the office will arrange staff to handle the complaint as soon as possible.
- (7) The office may take photographs, audio and video recordings to collect evidence at the suspected infringing booth, or cooperate with the administrative and judicial departments to collect evidence on the spot, or cooperate with the notary department to conduct notarization, and the exhibitors shall cooperate. The office shall be responsible for the confidentiality of the materials obtained by taking photographs, audio and video recordings, and shall not provide them to the public except through legal procedures.

(8)The on-site office handles the case of suspected infringement, and the respondent shall actively assist the office staff in inspecting the suspected exhibits after being informed of the suspected infringement of the exhibits on display. If the respondent believes that the complained product is not infringing, it shall present relevant evidence in a timely manner and make a certificate of non-infringement.

(9)If the respondent is unable to provide effective evidence of "non-infringement" on the part of the exhibits complained of alleged infringement, the office staff has the right to take measures such as covering up and removing the exhibits suspected of infringement. The Respondent shall cooperate in signing the "Notice of Assistance in Investigation and Handling" and undertake not to operate or exhibit the allegedly infringing exhibits during the exhibition. If the respondent refuses to cooperate with the measures to cover up or remove the exhibition, or re-exhibits the allegedly infringing exhibits after on-site mediation, causing losses to the exhibition organizer or the respondent, the respondent shall bear the corresponding legal responsibility to the exhibition organizer and/or the complainant.

(10) If the respondent has any objection to the handling result, he or she may submit supplementary evidence of non-infringement to the on-site office within 24 hours. If the evidence is valid, the office shall immediately revoke the relevant measures and allow it to continue to exhibit; If the evidence presented is invalid, overdue, or no supplementary evidence is presented, the General Assembly has the right to maintain the relevant handling measures.

(11) The protection of intellectual property rights at the exhibition is a temporary remedy, and the on-site office handles the suspected infringement cases, and the office staff makes a preliminary judgment on the infringement based on their professional knowledge and experience, and informs the complainant of the reasons for the decision. If the complainant does not accept the result, he or she may directly file a lawsuit with the people's court or submit a request to the department responsible for intellectual property management for the alleged infringement of the complainant. The complainant shall not disturb the order of the exhibition and the on-site office, otherwise he shall bear the corresponding responsibilities to the exhibition organizer.

(12) If the complainant's request is less than 24 hours before the end of the exhibition, the on-site office will not accept it.

(13) If the complainant withdraws the complaint, the "Application for Withdrawal of Complaint" shall be submitted during the development period, and the on-site office will not accept the withdrawal application if it is not submitted during the development period.

(14) In order to maintain the order of the conference, the complainant shall not take further action against the respondent at the exhibition site (except for notarization and evidence collection) after the office has made a disposition and the respondent has accepted the treatment, and before the end of the exhibition.

10. These provisions shall come into force on the date of promulgation, and if there is any conflict between the previous relevant provisions and these provisions, these provisions shall prevail. If these provisions are not provided for or conflict with relevant national laws and regulations, the relevant national laws and regulations shall prevail.

Note: The "Exhibitor Intellectual Property Information Filing Form" can be downloaded from <https://www.ciff-gz.com/download>

Health Security Work

- I. The Organizer designates the exhibitor's leaders as the persons in charge of health, who shall be responsible for health security work of their own enterprises and keep informed on the health status of their staff. All participants shall consciously obey management of the persons in charge of health, cooperate with them and provide personal information about sanitation and epidemic prevention.
- II. Participants shall maintain good working and living environment and personal hygiene, take preventive measures if in public places, pay attention to dietetic hygiene, natural ventilation indoors, climate changes, cold prevention and warmth retention, strike a proper balance between work and rest, take care of themselves and shall not dine out casually or go on working in spite of illness.
- III. In case of fever, cough, headache, vomit, diarrhea or other discomfort in the hotel, report to the persons in charge of health immediately and go to the nearby hospital for check and treatment immediately. Do not go on working in spite of illness and do not enter the Complex. If the said symptoms occur in the Complex, report to the Organizers' health security duty room immediately to arrange check and treatment in the designated hospital.
- IV. To ensure the hygienic safety of the Complex, exhibitors shall cooperate with the security staff in prohibiting takeaway in the Complex. Participants shall dine at the canteen provided by the Organizer as far as possible. Do not bring the food such as box lunch to the Complex if eating out.
- V. Participants shall strictly comply with the rules and regulations of the Organizer concerning health security, strengthen organization discipline, safeguard the normal order consciously and shall not discuss, inquire or disseminate relevant information casually.
- VI. The Organizer shall publicize the knowledge about personal hygiene and disease prevention and publish the relevant health security information through the relevant media. Participants shall keep abreast of the health trends and disease prevention knowledge and enhance awareness of disease prevention.
- VII. The Organizer sets up a clinic on the Zhujiang Walkway.
- VIII. The Organizer prohibits participants from bringing food to the halls. Exhibitors may provide their clients with food such as cakes subject to the approval of the authority concerned such as Health Supervision Department.
- IX. Everyone is the first person responsible for his/her own health. He/she should adhere to good hygiene habits such as wearing masks and washing hands frequently. He/she should keep a distance between people in public places and complete vaccines and immunization in a timely manner. When the epidemic is severe, the elderly, pregnant women and children with underlying diseases should minimize their visits to crowded places. Asymptomatic infected persons and mild cases should take home self-care, reduce contact with fellow residents, rationally use symptomatic drugs according to relevant guidelines, do a good job of health monitoring, and promptly go to a medical institution if the condition worsens.

Chapter 3 General Guide to Booth Construction

General Guide to Booth Construction

These Booth Decoration Instructions and Forms are designed to assist exhibitors in setting up their exhibition booths, please complete all forms and return them to the Organiser Contractor before the deadline to ensure timely processing. For all furniture and electrical appliances, a 20% surcharge will be charged for late applications and a 50% surcharge for on-site applications.

| | Shell Scheme Booth Form | Deadline |
|----|--|-------------------|
| B1 | Fascia Board (Optional) | February 21, 2026 |
| B2 | Service Location Plan (Must be returned) | March 5, 2026 |
| B3 | Furniture Rental (Optional) | March 5, 2026 |

| | Raw Space Form | Deadline |
|----|--|-------------------|
| B4 | Raw Space Construction Application(Must be returned) | February 21, 2026 |
| B5 | Power for Lighting Rental (Must be returned) | February 21, 2026 |
| B6 | Telephone Rental (Optional) | February 21, 2026 |

Please complete the form and return it to the Fair Main Site Contractor by email or fax

Shell Scheme Booth Specification

Each standard booth (outer size: 3 m x 3 m; Inner size: 2.97m x 2.97m) are all standard according to the following specifications:

| | |
|-------------------|---|
| Fascia Board: | Standard fascia board with booth number and exhibitor's name in both Chinese and English |
| Wall Paneling: | A fascia board, three-side walls (white laminated panels) held by aluminium modular system. |
| Furniture: | One Square Table (aluminum), two folding chairs, one waste basket and booth carpet. |
| Electrical Items: | Two 100W spotlights. |

Illustrate:

- A) Booths of less than 18 square meters can only get the furniture and electrical configuration provided to the standard booth of 9 square meters, and only the booth with a booth area of 9 square meters can get the corresponding multiple of furniture and electrical configuration.
- B) If the exhibitor orders two or more standard booths in a row in a row, the organiser contractor will remove the hoarding between the two booths unless specifically requested by the exhibitor.
- C) No nails or any devices shall be nailed to the hoarding, aluminum support, floor, ceiling, column and fire sprinkler, and compensation shall be made according to the price if there is any violation.
- D) It is strictly forbidden to connect or increase lighting fixtures without permission, and the power socket applied for shall not be plugged into the booth lighting fixtures, and its maximum capacity shall be within 500W, and electrical equipment exceeding the capacity shall not be used. It is strictly forbidden to use the socket board in series.
- E) All the electrical facilities and equipment installed on the booth equipped with the standard booth shall not be dismantled or displaced at will, let alone taken out of the exhibition hall.
- F) Exhibitors' own non-lighting electrical equipment (e.g. televisions, VCRs, refrigerators, etc.) must be approved by the contractor, and the use of electrical installations with non-conforming electrical circuits in the booth is strictly prohibited.
- G) If exhibitors wish to rent items not listed in the form, please contact the contractor directly.
- H) Exhibitors are responsible for maintaining the integrity of the booth facilities and rented items, and are responsible for compensation for any damages.

Raw Space Construction Regulations

When applying for the special installation project, the booth shall submit the copy of the business license of the construction unit, the copy of the ID card of the legal representative (must be stamped with the official seal of the construction unit), the original construction drawings (in duplicate) and stamped with the official seal of the construction unit to the home contractor for review before the specified date.

Exhibitors who rent the open space must choose the construction company certified by China Foreign Trade Guangzhou Exhibition Co., Ltd. to set up the booth, and please read the following precautions and fill in the form B4-B5, and return to the home contractor within the specified date.

1. Anything mentioned in 《Regulations for Stand Construction & Decoration》 is to be abide.
2. The construction must be constructed to comply with the dimensions of the space allocated. It's vertical projection cannot be over boundaries of this line..
3. Fire safety requirements for special booth erection:
 - a. Height limit for booth construction: single-layer booth height is 4.5 meters, and the highest point of Double-Decker booth shall not exceed 6 meters. If the booth is built too high, the on-site fire department will investigate and handle all responsibilities and consequences at the exhibitors' own responsibility (all booths in Halls 1.1 to 5.1 in Area A are limited to 4.5m in height; All booths in South Plaza 10.0 and 11.0 in Area B are limited to 4.5m in height and 60KG/ m² in weight).
 - b. All closed special booth, at least two entrances and exits.
 - c. Installed under 2 meters and a single glass area of more than 3 square meters, or installed in a position above 2 meters, regardless of the size of the area, all need to use tempered glass.
 - d. The decoration of the use of wood materials should be according to 0.5 kg per square meter of fire retardant paint for flame retardant treatment; With cloth material decoration and capping, there should be 0.2 meters between cloth and cloth, and spray flame retardant according to 5 square meters/kg (nylon cloth, mesh cloth according to 8 square meters/kg).
 - e. All decoration and decoration materials must be made of non-combustible or non-combustible materials. The exhibition hall is not allowed to use non-flame retardant treatment of grass, rattan, paper, bark, foam, reed, bamboo, combustible plastic board (Bandong board, KT board, sunshine board), combustible carpet, cloth and wood for decoration and decoration materials.
 - f. Billboards, light boxes, lamp posts must have convection heat dissipation holes, fluorescent lamp ballast should be used fire research units qualified products.
 - g. Each booth downlights, spotlights, quartz lights and other lamps must be installed with exhibits, ornaments, etc. at a distance of more than 0.3 meters, and should be installed with junction boxes, wires should not be exposed.
 - h. The use of inflammable, explosive and dangerous chemical products is prohibited. Including tenna water, pine water, alcohol and lighter gas, hydrogen, oxygen and other volatile flammable solutions, flammable gases.
 - i. The backboard of the booth must be beautified and decorated to maintain the overall beauty of the exhibition hall.
 - j. Shall not be in the exhibition hall pedestrian passage, stair intersection, elevator door, fire facilities, air conditioning machine return air outlet and other areas at random, random hanging, random nail all kinds of exhibits, promotional materials or other signs.
 - k. The special booth structure shall not block or cover the ground electric wellhead, lighting, power box, telephone distribution box. Do not block the fire hydrant, do not occupy the fire channel.
 - l. The electricians of the exhibition unit must hold valid certificates to work, otherwise they are not allowed to enter the museum for construction.
 - m. No open fire is allowed in the exhibition.
 - n. The conference does not advocate special booth capping. If you need to cap, you must install hanging automatic fire extinguishers (6 kg) according to fire regulations, 1 per 20 square meters, 2

per 20-30 square meters, and so on.

- o. The installation of electricity in the exhibition site must be declared to the home contractor in advance, after review, under the supervision of the assembly electrician can be implemented, it is strictly prohibited to install power and pull wires without authorization. The exhibitor is responsible for connecting the pile under the switch of the electric box. The builder shall bring his own electric box to connect with the electric box provided by the exhibition hall. Direct connection with the electric box provided by the exhibition hall is strictly prohibited.
 - p. Booth drawings include front, side and section, indicating size, materials, text description and power load, and attached circuit diagram. All drawings must be submitted to the site contractor by February 21, 2026. For the design drawing that does not meet the requirements, the home contractor has the right to reject the approval of the drawing and ask the exhibitor to make amendments.
 - q. Enter the construction site personnel must wear a good helmet in accordance with the regulations. The material and construction of the scaffold must meet the requirements of the construction code and be firm and reliable. It is forbidden to use a step ladder with a length of more than 2 meters. When working at height of more than 2 meters, you must use scaffolding and other climbing facilities, and there must be personnel standing by to watch over the operation. The workers working at height must wear safety belts correctly according to the principle of "high hanging and low use". It is forbidden to use scaffolding with safety risks. The ladder used for construction must be strong and reliable. Safety helmet must be worn when working on stairs.
- 4.Strengthen the civilized management of the construction site, shall not wear slippers, light limbs into the construction of the museum.
- 5.All construction materials and exhibits must be evacuated and properly disposed of by exhibitors before the specified time on March 22, 2026; Additional charges apply if processed by the Conference.
- 6.No construction, construction or assembly is allowed in the lobby without permission. The structure of the floor, walls, doors, Windows or other parts of the building shall not be altered. No nails, screws or holes shall be driven into any part of the building. Losses caused by violations shall be borne by the responsible party.
- 7.Do not use the main equipment and facilities of the exhibition hall to rely on the exhibition frame of the booth. It is strictly forbidden to hang objects on fire sprinkler facilities or lamps. Construction units are not allowed to hang or pull heavy objects on the grid, and once they are found hanging without permission, they shall be removed immediately and fined.
- 8.Only non-residual single-sided or double-sided cloth sole tape is allowed to be used to fix carpets and other floor coverings to the cement floor. Do not use adhesive on stone floors or walls. It is not allowed to use sticky (pastable) patterns or promotional materials on the back to any part of the building. In case of violation, the cleaning fee will be paid by the exhibitor.
- 9.Please do not bring the same or similar display tools and aluminum materials to the exhibition hall for construction. If the above items are needed for construction, the exhibition hall should be checked and prepared by the staff of the property Department before entering the exhibition hall, otherwise the exhibition hall has the right to deny the release of the above materials when the exhibition is withdrawn.shall not wear slippers, light limbs into the construction of the museum

Double-Decker Booth Construction Requirements

With regard to safety and fire protection, double-decker booth construction is not permitted in principle. If double-decker booth is requested, please submit a special application in written form. All double-decker booth designs should abide by the following rules.

1. The special decoration unit to build a Double-Decker booth must have the following qualifications:
 - a. With independent legal personality, through the special qualification audit of A-level units, at the same time by the industrial and commercial departments to engage in construction and exhibition engineering professional companies;
 - b. The registered capital must be more than 2 million yuan (including 2 million yuan);
 - c. With more than 3 years of experience in large-scale exhibition special installation construction.
2. The booth area is not less than 180 square meters can apply for the construction of Double-Decker booth.
3. The Double-Decker booth must be designed and built by a professional company with relevant qualifications, and the total height of the Double-Decker part of the booth cannot exceed 6 meters (if the above provisions are violated, the exhibition will deduct 50% or more of the construction deposit according to the circumstances; Continuous violation of the enterprise, the exhibition will reject its application for participation).
4. The approval of whether to build a Double-Decker booth will refer to the following relevant factors:
 - a. The location and area of the booth in the exhibition hall, whether it affects the overall effect of the exhibition hall, blocks the relevant signs of the exhibition hall, or affects the visual effect of adjacent booths.
 - b. The area of the second floor shall not exceed 30% of the area of the first floor and shall not be less than 50 square meters. The height of the second floor from the ground shall not be less than 2.5 meters to ensure the safe structure of the booth.
5. Double-decker booth materials and electricity safety requirements:
 - a. Double-decker booth bearing structure must be built with steel, and do a good job of anti-leakage protection grounding.
 - b. Decorative materials must be non-combustible or non-combustible materials, electrical parts must be constructed in strict accordance with the requirements of electricity.
 - c. The material standards used in the booth construction must comply with the corresponding national regulations on the floor, coaming and ceiling.
6. Fire extinguisher configuration: Due to the Double-Decker booth blocking the fire sprinkler, in order to ensure safety, the first-layer booth must be equipped with a hanging fire extinguisher (6 kg), one for every 20 square meters, two for 20-30 square meters, and so on.
7. The booth on the second floor is limited to business negotiation, no exhibition samples are allowed, and no electric heating appliances are allowed; It is strictly prohibited to carry out other activities deemed unsafe by the public security and fire departments, and it is prohibited to engage in various demonstration activities.
8. The double-storey stand must be designed so that it can be installed and removed within the specified time, the upper level of the stand cannot cross the corridor of the exhibition hall, and the stairs, open exhibition areas and meeting areas must be at least three meters away from the corridor.
9. There should be at least 3 meters between the adjacent booth spacing, if you can not maintain this spacing, you should install not less than two meters high screen so that the two booths are completely isolated, and the side facing the adjacent booth should be white, clean and blank appearance. The adjacent booth can use this side for promotional purposes.
10. The railing of the second floor shall not be less than 0.9 meters. The ground at the opening of the booth on the first floor shall be equipped with 0.05m high anti-shaking wood blasting strips. The railing should be made into a circular arc to prevent objects from slipping off the railing.
11. Bearing: the application documents submitted should indicate the specified purpose of the upper booth, the second floor booth can only be used for negotiations, meetings, not for storage and other purposes, and the upper booth bearing capacity shall not be less than 200 kg/square meter; All stairs must be built according to

DIN18065 with a carrying capacity of not less than 200 kg/m²; The design of the railings and pillars shall ensure that a force of 1000 N/m² can be applied horizontally at the handrails.

12. The escape route from the farthest point of the upper booth to the corridor should be less than 25 meters away.
13. When the booth area of the second floor is less than 100 square meters, there should be a staircase; If the upper booth area is more than 100 square meters, there should be at least two ladders or an evacuation width greater than 2M. If necessary, the organizer has the right to require exhibitors to add additional safety or fire protection facilities until the design of the entire stand meets the fire protection requirements.
14. The drawings for the Double-Decker exhibition stand must be approved by a professional company with relevant qualifications, and the relevant costs shall be borne by the exhibitors.
15. Where the construction unit of the Double-Decker booth, must have experience in the construction of large-scale exhibition, have the ability and promise to bear the responsibility for all accidents that occur. In the implementation of the construction and use, must be subject to the supervision of the General Assembly.
16. To build a Double-Decker booth, an application must be submitted to the contractor of the conference before February 21, 2026, and the following information must be provided when applying: (and all drawings must have the seal of the design institute above Class B (including Class B) and the seal of the national first-class registered structural engineer).
 - Two copies of "Double-Decker booth special decoration application" form.
 - Original and photocopy of the business license of the construction unit (with official seal).
 - Two copies of color stereoscopic renderings of the booth (including bird 's-eye view).
 - Four copies of the floor plan of the first floor booth.
(size and material indicated on the drawing).
 - Four copies of the floor plan of the second floor booth.
(size and material indicated on the drawing).
 - Four copies of the structure of the combination of beam, column and floor, .
 - Four copies of front elevation drawing and side elevation drawings
(the height and material are indicated on the drawing).
 - Two copies of electrical distribution diagram and distribution system diagram.
(the diagram indicates the electrical materials).
 - Four copies of section view in quadruplicate.
 - Two copies of static load test report or static load calculation and material instructions
(Grade B or above < including Grade B > design institute seal, national level 1 registered structural engineer seal).
 - Two copies of booth planning manual and erection material technical data report.
 - Two copies of safety responsibility letter, in duplicate, stamped with the official seal of the construction unit, and the person in charge signature, leave contact information.

Construction Requirements for Floating Sill Booths in Area A/Area B/ Area C north corridor/flyover booth

Based on fire and security reasons, the exhibitors for floating sill booths in Area A/Area B/Area C north corridor/flyover shall abide by the following requirements during the booth construction and management:

- I. The height of north floating sill booth in Area A/Area B/ flyover booth shall be less than 2.5m. The height of Area C north corridor booth shall be less than 2.8m. Enough passage shall be provided during move-out.
- II. The north floating sill booths in Area A/Area B/ flyover booth require strict control of electricity use. The maximum shall be less than 54A and 380V (namely 85% of 63A/380V). The floating sill booths in Area B have no power supply. Installation cost shall be paid separately in case of use (63A power supply).
- III. No water supply and drainage facilities will be provided for the floating sill booths in Area A/Area B/ flyover booth.
- IV. The opening of the floating platform booth is retracted into the floating platform 1 meter, and the booth tables and chairs cannot be placed in the booth, so as not to affect the evacuation of people in the aisle.
- V. One meter aisle is set aside at the back of the floating platform booth to prevent falling objects.
- VI. In case of any activities arrangement during the CIFF, it is necessary to submit the related activities plan and go on subject to the approval of the sponsor.
- VII. No show in any form shall be arranged in or around the booths during the CIFF. The audio promotion and performance volume in the booth shall be less than 60db.
- VIII. It is required to arrange security guards to take care of the booths in the evening. No valuables shall be stored. In the event of lost goods in the booth, the exhibitors shall be held responsible for all the consequences.

Requirements for the Use of Suspension Points

Only in Area B and Area D of the Canton Fair Complex support suspension service. Service providers are authorized by the Canton Fair Complex, responsible for the marketing, operation, and execution of suspension points within exhibition halls. Suspension service is applied for by exhibition/event organizers or venue contractors to service providers.

I. Suspension Parameters

1. Area B: Suspension points cover the entire area. Each suspension point has a load capacity of 200kg. The height from the upper edge of the hanging structure to the floor is ≤ 6.5 meters for single-layer and double-layer booths in first-floor and second-floor exhibition halls, and ≤ 6.5 meters for single-layer booths and ≤ 8 meters for double-layer booths in third-floor exhibition halls.
2. Area D: Suspension points cover the entire area. Each suspension point has a load capacity of 200kg. The height from the upper edge of the hanging structure to the floor is ≤ 6.5 meters for single-layer booths and ≤ 8 meters for double-layer booths.

II. Responsibilities

Suspension service providers install slings and hoists and place them at designated heights. Users of the suspension points provide suspended objects below the hoist hook and are responsible for device safety.

III. Guidelines to Structural Suspension Service

1. Suspension requirements of structural lifting points
 - (1) Structural hanging points can be suspended including: lamps, projectors, light boxes, signboards, ceiling ceilings, LED screens and trusses and metal frame structures for hanging the above equipment
 - Suspension shall be prepared and assembled by the user of the lifting point.
 - The hangings must be solid and reliable metal or steel and wood assembly structure, shall not hang pure wood structure, ultra-low sound and linear array sound.
 - The lifting point cannot be used for lifting other non-hanging objects and equipment.
 - The suspension shall be in a static display state and shall not be used for any active structure or equipment suspension.
 - The suspension structure shall be an independent suspended structure and shall not be connected with the ground structure.
 - The facilities and equipment affecting the safety of the Canton Fair exhibition hall shall not be suspended.
 - (2) The size of the hanging structure must not exceed the size of the booth.
 - (3) The load of the hanging structure must be evenly distributed. Uneven load causing structural instability or other safety hazards is not allowed.
 - (4) If the suspended objects involve electrical connections, the wiring should be neat. High-voltage wires must be laid in conduits, while low-voltage signal wires may be laid without conduits but must be arranged neatly. Electrical wire joints are not allowed to be wrapped with tape and must be connected using insulated terminals. An independent power control switch must be installed on the ground.
 - (5) The connection between the hanging structure and the truss must be firm and reliable.
 - (6) The connection between the hanging structure and the hoist hook must use a dedicated lifting shackle, and detailed drawings should be provided.
 - (7) Each device installed on the hanging structure must be equipped with a separate steel wire safety device (as shown in the drawing).
 - (8) The fire resistance rating of the hanging materials must reach Class B1 or above.
 - (9) Detailed construction plans and techniques, as well as structural load calculation documents (bearing the stamp of a registered first-level structural engineer), must be provided for complex booths.
 - (10) Special trusses must be used for the main load-bearing truss structure, meeting national specifications and having a firm and reliable connection. The material specifications and models of the load-bearing truss, as well as detailed connection diagrams, must be provided. Self-welded trusses are strictly prohibited.
 - (11) The span of the 200mm aluminum frame should be within 4 meters, that of the 300mm

aluminum frame should be within 6 meters, and that of the 400mm aluminum frame should be within 9 meters, based on actual suspension plan.

2.Requirements for Structural Suspension Equipment

(1) When using more than 16 suspension points for a single structure, electric hoists should be used to ensure the safety during lifting and lowering. Electric hoists used for the entire structure should be of the same brand and specification.

(2) The hanging structure should adhere to the principle of vertical suspension, with one suspension point assigned to each hoist. Tilting or pulling at an angle is not allowed.

(3) For the use of suspension points, please rent electric hoists or manual hoists from the Canton Fair Complex. Suspension service providers of the Canton Fair Complex are responsible for the installation of suspension points (sling), hoist installation, and hoist collection. After the hanging structure is suspended, the chain from the floor to the suspended object should be taken care of by the booth contractor. Lifting and lowering of suspended objects using rented electric hoists is carried out by suspension service providers of the Canton Fair Complex. The lifting and lowering of suspended objects using rented manual hoists in the booth is carried out by the user of the suspension points under the supervision of the suspension service provider.

3.Application for Suspension Service

(1) The user of suspension points should submit the application for suspension service to the exhibition organizer or venue contractor. Booth contractors of the Canton Fair Complex must submit the application for suspension service and equipment rental to the suspension service provider 20 calendar days before the start of the exhibition, along with the initial version of application materials and drawings (electronic version). Please refer to item (4) "Checklist for Application Documents for Suspension Service". The number and locations of suspension points must be confirmed. Finalized application materials and drawings (two hard copies with official seals) should be submitted to the suspension service provider 7 calendar days before the start of the exhibition.

(2) For special exhibitions with consecutive exhibition periods, the deadline for suspension point and equipment rental applications will be adjusted by the Canton Fair Complex based on scheduling. The specific dates will be announced after consultation between the suspension service provider and the Canton Fair Complex.

(3) Applications for suspension service must be submitted in advance within declared time. On-site suspension point applications submitted after the deadline will not be accepted. Suspension point locations and equipment rental applications that are submitted after the deadline or not completed within the specified time must be reviewed and approved by the suspension service provider based on the feasibility of on-site execution before the order can be confirmed. Suspension service providers of the Canton Fair Complex have the right to unconditionally reject applications for suspension point locations and equipment rental submitted after the deadline or not completed within specified time.

(4) Checklist for Application Documents for suspension service:

| Num ber | Category | Description |
|------------|--|---|
| 1 | Suspension Service Confirmation Form | The confirmation form should be submitted in hard copy with the official seal of the suspension point user. |
| 2 | Suspension Service Safety Commitment Letter | The safety commitment letter should be submitted in hard copy with the official seal of the suspension point user. |
| 3 | Approval Certificate for Suspension Point Structure at the Booth | The finalized version should be submitted in hard copy with the official seal of the exhibition/event organizer or venue contractor (they can create their own version). |
| 4 | Booth Construction Insurance | The insurance should cover the installation and dismantling of suspension points. |
| 5 | Drawings for Suspension Point Structure | 1. Overall layout of suspension points in the entire exhibition hall (orientation diagram). 2. Multi-angle renderings of suspension point booths. 3. Dimensional distribution diagram of suspension points (drawn according to the available suspension point locations in the exhibition hall, clearly indicating the positions of all suspension point booths and the distances from the four sides of the booth). 4. Detailed list and description of material and weight for suspended objects. 5. Data list for suspended objects (clearly indicating the dimensions, weight, material specifications of each structure, equipment models, specifications, quantities, and self-weight on the structure). 6. Connection methods between suspension structures, hoist hooks, and |

| | | |
|---|---|--|
| | | trusses. 7. Blueprint of booth suspension structure and suspension point load-bearing report designed by a qualified design entity, with design stamps on the drawings and reports. |
| 6 | Application Form for Suspension Point Lifting | The application should be submitted 4 hours in advance and in hard copy with an official seal (can be provided on-site). |

(5) The suspension point user must ensure the authenticity and accuracy of the declared information and must not make unauthorized changes. Once the suspension plan is approved, the on-site construction must be carried out according to the confirmed plan. If it is found that the on-site construction deviates from the originally submitted plan or the suspended objects exceed the declared weight, the exhibition hall has the right to stop on-site construction. The suspension point user must reduce the weight of suspended objects or add suspension points as required. Additional cost for suspension points on-site will be charged at 2.5 times the original price.

(6) The suspension point user is responsible for any related costs incurred due to late application caused by the disapproval of the suspension plan or other reasons. The suspension point user is also responsible for any rectification costs and other losses incurred due to failure to implement declared weight.

(7) Booth contractors are responsible for the electrical distribution, testing, and commissioning of hanging equipment. If this affects the lifting of booth structure, the booth contractor shall bear the responsibility.

(8) If the booth contractor rents manual hoists from suspension service provider, once the hanging structure is in place, the hoist chains should be properly stored by the booth contractor according to requirements.

4. Workflow for Structural Suspension Service

(1) The suspension point user (exhibitor/booth construction entity) submits the application for suspension service to the venue contractor of the Canton Fair Complex.

(2) The main contractor of the Canton Fair Complex conducts initial review of the documents and drawings, compiles qualified booth information, and submits the application to the suspension service provider.

(3) The suspension service provider reviews the application materials and communicates with the main contractor and the suspension point user to make any necessary modifications or supplementary submissions for problematic booths. For booths that pass the initial review, the suspension service provider provides review opinions and a suspension point layout plan to the main contractor for confirmation.

(4) The main contractor of the Canton Fair Complex and the suspension point user confirm the suspension point plan, conduct a re-examination of the application materials, and submit both the hard copy and electronic version of the application materials to the suspension service provider. The suspension point layout plan must be confirmed and stamped by the exhibitor/booth construction entity.

(5) Booth layout is marked on-site. Suspension point user, venue contractor of the Canton Fair Complex, and suspension service provider jointly determine the location of hanging structure and suspension points.

(6) The suspension service provider installs suspension straps and hoists.

(7) After the booth contractor completes installation of the hanging structure and self-inspection of suspension point bindings, it applies for lifting of the hanging structure. The lifting can be carried out only upon joint inspection and approval by the main contractor of the Canton Fair Complex and the suspension service provider.

(8) If the booth contractor rents manual hoists from the suspension service provider, the lifting operation is conducted under the joint supervision of the main contractor of the Canton Fair Complex and the suspension service provider. If an electric hoist is rented from the suspension service provider, the booth contractor cooperates with the suspension service provider in the lifting of the hanging structure.

(9) Once the booth's hanging structure is lifted into place, venue contractor of the Canton Fair Complex submits the booth suspension service confirmation form to the suspension service provider to confirm the completion of suspension point lifting and specify the quantities of suspension points, rented trusses, hoists, straps, and chain bags.

(10) After the exhibition concludes, the booth contractor dismantles the ground exhibition structure and levels the area. Once the floor meets the requirements for lifting operations, the booth contractor applies to the venue contractor of the Canton Fair Complex for lowering the suspending structure.

- (11) The venue contractor of the Canton Fair Complex and the suspension service provider conduct an on-site inspection. The lowering of the suspending structure is allowed if the ground meets the requirements for lifting.
- (12) If the booth contractor rents manual hoists from the suspension service provider, the lowering of the suspending structure is conducted under the joint supervision of the venue contractor of the Canton Fair Complex and the suspension service provider. If an electric hoist is rented from the suspension service provider, the booth contractor cooperates with the suspension service provider in the lowering of the suspending structure.
- (13) After the booth contractor completes the dismantling of the hanging structure, the suspension straps and hoists are collected by the suspension service provider.
- (14) The venue contractor of the Canton Fair Complex signs and confirms the exhibition's suspension service contract with the suspension service provider, verifying the workload and concluding the suspension service.

5. Fees

| No. | Suspension Point | Fees |
|-----|--|---------------------------|
| 1 | 200 KG capacity suspension point | 2,000 CNY/Unit/Exhibition |
| 2 | Manual chain hoist with 10-12m chain (1 ton) | 300 CNY/Unit/Exhibition |
| 3 | Manual chain hoist with 15-20m chain (1 ton) | 450 CNY/Unit/Exhibition |
| 4 | Electric chain hoist with 10m chain (1 ton) | 1,200 CNY/Unit/Exhibition |
| 5 | Electric chain hoist with 20m chain (1 ton) | 1,500 CNY/Unit/Exhibition |

Notes:

1. Structural suspension points refer to suspension points for hanging booth structures, lighting fixtures, sound equipment, and other non-lightweight items.
2. The above prices include installation fee for the hoist. When applying for suspension points, it is mandatory to rent the hoist equipment provided by the Canton Fair Complex and use of self-provided hoists is not allowed.
3. All drawings of suspension points must be submitted for approval at least 20 calendar days before entering the venue. The quantity and locations of the suspension points must be confirmed at least 7 calendar days before entering the venue. On-site suspension point applications will not be accepted.
4. Suspension point fees are charged based on the number of mother points used. For safety reasons, a single conversion frame can have a maximum of two contact points with hanging items. If there are more than two contact points, the suspension service provider will assess safety factors such as load capacity. If conditions permit, the number of contact points under the conversion frame can be increased, and the suspension point fees will be charged based on the number of contact points under conversion frame.

| 150A/380V(<75 KW) | 7,950 | | |
| 200A/380V(<100 KW) | 10,900 | | |
| 250A/380V(<125 KW) | 13,650 | | |
| 220V construction electrical box service fee | 100yuan/lot/time | | |
| 380V construction electrical box service fee | 130yuan/lot/time | | |
| The booth electrical box was moved | 150yuan/lot/time | | |
| Total: | | | |

Remark:

1. According to the opinions of the safety production supervision department, due to the high incidence of accidents during the construction of the special exhibition booth, the construction electricity and the display electricity need to be managed separately. As a result, the exhibition hall will charge the service fee for the construction electrical box, as follows: 220V construction electrical box service fee: 100 yuan/piece/time; 380V construction electrical box service fee: 130 yuan/piece/time.

2. A 20% surcharge will be charged for applications beyond the deadline, and a 50% surcharge will be charged for on-site applications.

3. Exhibitors must rent the electrical box of the exhibition hall, and the electrician of the exhibition hall is responsible for the electrical connection from the electrical box to the fixed facilities of the exhibition hall; The location of the electrical box is allocated by the contractor according to the load of the ground well of the venue. The exhibitor shall be responsible for the electrical connection work of the electric box switch pile, and the builder shall bring his own electrical box to connect with the electrical box provided by the exhibition hall, and it is strictly forbidden to connect directly with the electrical box provided by the exhibition hall.

4. The above quotation has included the rental of 1 electric box and the cable from the power supply point of the exhibition hall to the electric box, if the power consumption above 63A exceeds 30 meters, the exhibitor needs to pay the cable fee separately (63A-100A: 25 yuan/meter, 150A: 40 yuan/meter, 200A: 50 yuan/meter, 250A: 70 yuan/meter, 300A or more: 90 yuan/meter).

5. If you need 24-hour uninterruptible power supply, you need to charge 3 times the above price.

6. All the technical indicators of the lower electrical box shall not be greater than 80% of the technical indicators of the

upper electrical box, so as to ensure the safe operation of the power supply system of the exhibition hall.

7.The contractor must reply to the applicant within 3 working days after confirming the receipt of the application form, otherwise all costs incurred by the contractor shall be borne by the contractor.

8.Payment Method:

(1) If you use cheque or remittance, please pay the amount due before February 21 (late payment will not be accepted), and return the remittance slip together with this application form to the main contractor;

(2) If you pay in cash, please go to the main contractor on-site.

Safety Responsibility Agreement

B7

Booth No : _____

Exhibitor's Promise

We promise to have understood the *Service Manual* in detail, conscientiously manage and supervise the construction company to design and do construction in accordance with the state related compulsory technical specifications & standards for construction engineering and the requirements of the *Service Manual*, obey the management of the CIFF departments concerned on the construction site, provide fire extinguishing appliance according to rules and wear safety helmets to access the site. We shall be held responsible for any violation. In the event of self-construction, we shall sign and assume responsibility for safety of the construction company.

Principal's Signature:

(Company Seal)

Construction Company's Promise

We promise to have understood the *Service Manual* in detail. Upon signature of the Agreement, we shall automatically become a person-in-charge for safety of booth construction, water & electricity use, fire and public security and manage the booth production & construction safety, fire safety and exhibition safety & move-out safety during the CIFF. We manage and do construction in the light of the safe, civilized, economic and effective principle, avoid casualties and property damage accidents in the course of construction and promise as follows:

- ① Be held responsible for safety of our own property and staff, conduct safety production education for the staff beforehand, provide necessary safety measures and buy insurance for them and bear the cost arising therefrom.
- ② Ensure the compliance with all safety rules and assume all responsibilities for booth related safety & fire accidents and accidents and for all consequences arising from booth construction quality problems during the exhibition.
- ③ In the event of any booth related casualties and accidents, we shall assume all related loss arising therefrom.
- ④ We promise to accept the supervision and management of the Official Contractor and Convention & Exhibition Center, implement the safety guarantee & rectification measures, eliminate potential hazards any time and guarantee the Complex safety. In the event of any potential safety hazard, we shall conscientiously obey the compulsory management means of the Official Contractor.
- ⑤ In the event of accidents, we shall spare no effort to cooperate with the Organizer in emergency measures and all the aftermaths such as medical and compensation work.

Notice on the Entry/Exit Declaration Requirements for Overseas Exhibits

All Exhibitors:

In order to ensure that your overseas exhibits can be transported to the booths smoothly, and to avoid the entry and exit of overseas exhibits in violation of related laws and regulations, resulting in unnecessary losses, in accordance with the provisions of Articles 34 and 35 of the Annex of the **Announcement No.18 (2019) of the General Administration of Customs of the People's Republic of China**, the **Standardized Declaration Catalog and Interpretations of the Customs of the People's Republic of China** for Import and Export of Goods and the Circular of the State Council on Printing and Issuing the Work Program for Optimizing Port Business Environment to Promote Cross-border Trade Facilitation (GF [2018] No. 37), the matters requiring special attention for customs declaration of import and export of overseas exhibits are notified as follows:

1. Truthful Completion of the List and Uniform Format

- (1) **Container Number:** The number marked on the outer packaging.
- (2) **Packaging Material:** The actual material of the outer packaging (e.g., wooden outer packaging must have the IPPC mark).
- (3) **Outer Packaging Dimensions:** To be filled in truthfully.
- (4) **Volume:** To be filled in truthfully.
- (5) **Gross Weight:** To be filled in truthfully. Provide the accurate gross weight, especially for sea freight goods. All freight forwarders shall strictly check and provide accurate VGM (Verified Gross Mass) data.
- (6) **Net Weight:** To be filled in truthfully (for multiple items, each item's net weight must be filled in).
- (7) **English Commodity Name:** To be filled in truthfully.
- (8) **Chinese Commodity Name:** To be translated carefully; do not perfunctorily translate. If translation is difficult, relevant pictures and parameters shall be provided for reference.
- (9) **Chinese and English Materials:** For single-material products, provide the material name. For multi-material products, list each material name and confirm the location of each material (e.g., dining table: glass tabletop, pine table frame; for materials such as particleboard, plywood, MDF, indicate whether there is a surface covering and list the surface covering material if applicable).
- (10) **Country of Origin:** To be filled in according to the actual origin of the goods.
- (11) **Brand:** To be filled in according to the actual brand of the goods; fill in "None" if there is no brand. For machinery, provide a picture of the nameplate.
- (12) **Model:** To be filled in according to the actual model of the goods; fill in "None" if there is no model. For machinery, provide a picture of the nameplate.
- (13) **Exhibit Specifications:** Refer to the assembled dimensions of the exhibits (e.g., a table may be disassembled for transportation but reassembled for display; the assembled dimensions, not the outer packaging dimensions, shall be filled in).
- (14) **Latin Name of Materials:** If the goods contain solid wood components, truthfully provide the Latin name of the solid wood species (if the species is endangered, an endangered species certificate is required; otherwise, import is prohibited).
- (15) **Commodity Code:** Truthfully provide the initial commodity code for reference by the customs broker.
- (16) **Quantity and Unit:** To be filled in truthfully; "1 box" is not allowed. Clear quantity and unit shall be provided (e.g., "Catalogue: 1 box" is incorrect; it should be filled in as "Catalogue: 100 copies").
- (17) **Unit Price and Total Price:** To be filled in according to the actual price of the goods. Do not deliberately lower the price to reduce taxes or deposits. If the price is too low, the customs will conduct price assessment and impose penalties, affecting customs clearance efficiency. The final assessed price shall be based on the customs database.
- (18) **Disposal Method:** Simplified into 3 categories: a. Sold, b. Return, c. Consumed. To be filled in truthfully. Wooden products, boards, furniture, etc., cannot apply for consumption disposal. In principle, only promotional materials distributed can apply for tax exemption for consumption.
- (19) **Provide product pictures as much as possible, attached to the right of the corresponding commodity name on the list.** Each page of the list should preferably contain 10-15 items; if there are more items, a new page shall be used. The header of the list must be filled in truthfully, including the exhibitor's name, exhibitor's country, exhibition hall number, booth number, exhibition name, and for furniture exhibition goods, indicate whether they are for the first or second phase.
- (20) **Since the standard declaration elements vary for each exhibit, after receiving the list filled in by the**

exhibitor in accordance with the above requirements, the customs broker will review the commodity name again, list other required standard declaration elements, and ask the exhibitor to supplement relevant information through the freight forwarder.

2. Customs Requirements for Clearance Efficiency

- (1) Import of Air Freight Goods: Confirm that the list fully meets the declaration requirements before allowing overseas exhibitors to ship the goods. Otherwise, if the exhibitor ships the goods in advance without the list meeting the declaration requirements, resulting in delayed clearance efficiency and the customs refusing to accept the declaration, the overseas exhibitor and the freight forwarder shall handle the procedures for returning the goods or converting them to general trade list processing on their own.
- (2) Import of Land Freight Goods: Confirm that the list meets the declaration requirements before applying for import. For rapid clearance, the freight forwarder shall weigh the goods in advance in Hong Kong and provide the accurate gross weight.
- (3) Import of Sea Freight Goods: Contact the freight forwarder to select the exhibit transportation method:
 - For goods transshipped via Hong Kong: The list and relevant declaration elements must be confirmed by the customs broker before arranging the goods to be shipped to Huangpu by barge.
 - For goods shipped directly by sea: The list and declaration elements must be provided to the customs broker for confirmation before the goods are shipped from the port of origin. Otherwise, the exhibitor and the freight forwarder shall handle the resulting modification of the manifest and return of the goods on their own.

All goods shall be declared truthfully; under-declaration or omission is not allowed. If prohibited imported items are involved, the exhibitor shall actively cooperate and shall not forcibly import them. For any questions, please contact the official freight forwarder in a timely manner.

The 57th China International Furniture Fair (Guangzhou)
January, 2026

The organizer of the exhibition has entrusted Canton Fair Exhibition Design & Construction Co., Ltd.. as the designated general agent for overseas transportation and on-site operations. For any exhibits to be transported from Hong Kong or overseas to Guangzhou, you may consult its foreign freight forwarders (Mr. Xu: 15918599009; Mr. Xu: 13825020842).

I)ROUTING

All exhibits are best to be consolidated in Hong Kong from where they will be moved overland to Guangzhou.

II)DEADLINE FOR EXHIBITS AND CUSTOMS DECLARATION DOCUMENTS:

1. The exhibits must arrive at the said port/airport by the following dates and the documents must be sent to official forwarders by the following dates. (All exhibits shall be consolidated in Hong Kong from where they will be transported overland to the exhibition venue in Guangzhou.)

Time Schedule

- (1) Document Deadline: Appendix 3 to 6 February 18, 2026
- (2) Original Bill of Lading and Master Air Waybill February 18, 2026
- (3) Promotion Materials, Gifts and Consumables for
China Customs Censorship February 18, 2026
- (4) Exhibits reach Hong Kong Port/Warehouse (by Air and Ocean) February 22-24, 2026
- (5) Inbound Freight Payment to official forwarders March 6, 2026

Remarks:

*All exhibits (including outer and inner packaging) using log packaging materials must be fumigated in the country of origin and stamped with the IPPC (International Plant Protection Convention) certification mark. This requirement is valid in all countries and regions (including Hong Kong Special Administrative Region, Macau Special Administrative Region and Taiwan)

*The annual public holidays will affect the customs clearance delivery time. Therefore, all exhibitors must comply with the delivery schedule of the carrier..

*Overseas exhibitors can also obtain relevant information from the carrier's designated branches/agents. (including delivery date, shipping costs, etc.)

*Goods shipped from Hong Kong Special Administrative Region, Macao Special Administrative Region and Taiwan Region are regarded as overseas exhibits.

III)SHIPPING DOCUMENTS

Please fill in the shipping bill of lading or air waybill according to the instructions below:

| Consignee | Notify Party |
|---|------------------------|
| (Please contact the carrier to confirm the consignee) | The 57th CIFF |
| | Exhibitor: _____ |
| | Hall & Booth No: _____ |

Exhibitors should indicate that the goods are EXHIBITION GOODS on all waybills, and add the re-export to Guangzhou, China for exhibition purposes (please specify the name of the exhibition), and notify the carrier by fax or email immediately after shipment for the purpose of receiving and customs clearance.

(IV) CUSTOMS & EXHIBITION DOCUMENTS REQUIREMENT :

- Customs declaration list of temporary imported exhibits: one copy.
- Power of attorney for shipment: one copy.
- The logo of the International Plant Protection Convention (see page 57 for details: description and receipt of wood packaging quarantine requirements for entering China).
- If the exhibits are machinery, computer equipment and high-tech products, a product specification must be provided.
- If exhibits need to have a Hong Kong import and export permit, exhibitors must apply for it by themselves.
- According to the Regulations of the Customs of the People's Republic of China on the Supervision

of Exhibits, promotional souvenirs, catalogues, posters, maps and videotapes or CDs played on the site must be submitted in duplicate to China Customs for review before the exhibition. When the exhibits are delivered to the carrier, they will be delivered to the carrier by air mail or express delivery for forwarding to China Customs for review. Any samples that have not been reviewed by the Customs will not be given, distributed or used during the exhibition.

***Remarks:** the full set shipping manual will be provided to each exhibitor upon confirm to participation.

Should you have any query, please feel to contact us by phone number:

Remarks:

i) Quarantine Inspection and Fumigation: Details please refer to Notice-Page 53.

ii) All Food & Beverage/Plant products:

In accordance to the law of People's Republic of China, all plant / food products are submitted to quarantine authorization before shipment to China and on-site sanitary inspection. (At least one month before import to China)

Important: In order for the food and beverage/plant exhibits to be allowed to be imported, exhibitors are required to notify the carriers in advance and submit the accurate customs declaration list and relevant documents/samples to the carriers so that they can be submitted to the domestic quarantine authorities for approval of whether to import the exhibits into the Mainland for exhibition. For exhibits of table wine and alcoholic beverages, the detailed nature and type, quantity, capacity of each bottle, alcohol content and value must be reported. All such exhibits are subject to a tax and will not be refunded. If the domestic quarantine authorities determine that the exhibits are allowed to be shipped to the domestic exhibition, the relevant service and transportation costs will be negotiated separately.

VII) REMARKS

1. a. The above rates do not include the following fees:

- China Port Management Fee (calculated at 0.2% of the goods value, with a minimum charge of US\$7.00/shipping order)
- Port miscellaneous fees incurred in Hong Kong for outbound and return shipments, such as unpacking and terminal fees, terminal registration fees, air freight station handling fees, overtime storage fees at airports/terminals, Hong Kong Special Administrative Region Government import and export customs declaration fees (calculated at 0.05% of the goods value, with a minimum charge of US\$17.00/shipping order/shipment), and (Tradelink) data entry fee of US\$2.00/time
- Taxes imposed by the Hong Kong Special Administrative Region and Chinese customs, etc.

b. Exhibition customs tariffs:

The exhibits will be cleared by bonded provisional import and no tax will be charged if the exhibits are for display purposes only. However, after the end of the exhibition, if the exhibits are retained or gifted, they need to pay taxes in accordance with customs regulations. In addition, small gifts such as ballpoint pens, clocks, watches, key rings, etc., may be taxed according to their quantity and value.

2. Minimum 1 CBM /1 METRIC TON Per exhibitor for every surface consignment, whichever is greater, and minimum for 20'container is 23 cbm / freight tons, 40' container is 46 cbm / freight tons for FCL surface shipment.
3. Volume and weight conversion in air freight rate is 6 cbm = 1000 kilo.
4. Cargo arrived beyond deadline, **an additional handling surcharge 30%** will be added to cover the additional cost, but it is not a guarantee the late-come exhibit arrival the site before the opening of exhibition.
5. All freight charge must be settled in accordance with our schedule mentioned on attachment (TIME SCHEDULE). A2.5% outlay commission will be added for unpaid invoice beyond Fair open date.
6. Above rates are based on General Cargoes (packed or unpacked) only. For specialized cargoes which need hiring of floating cranes, lighters etc., additional charges will be levied in accordance with actual outlays.
7. Unpacked cargo without container is accepted.
8. Our fees and charges are subject to revision so as to reflect any increase in our costs caused by exchange rate variations, increased freight or fuel charges, adjustments in insurance premium, revise of the tariff of our agent at exhibition city, or increases of any other charges pertaining to the shipment of this consignment beyond the control of this company which come into effect after acceptance of your order and prior to delivery to the consignee.
9. All overseas shipments (sea freight or air freight) must be consigned as per our instruction at front page on "FREIGHT PREPAID" basis, otherwise we will levy **3-5% commission** on the freight which we pay on your behalf to the local carriers.
10. Above rates are quoted for all exhibition hall at ground floor, a 20% surcharges for upstairs will be added.
11. Official forwarder reserve the rights to amend the above rates if in case the exhibition is changed its date, city or venue.
12. Surcharges for handling of dangerous cargo will be given upon request.
13. All ocean bills of lading and documents must be mailed to the carrier before the deadline in accordance with the shipping guidelines, otherwise the delay will not be caused by the carrier.
14. Official forwarder reserve the rights to issue separate quotation for individual package with dimensions attaining or exceeding-
 LENGTH:5M WIDTH:2.1M HEIGHT:2.1M
15. Official forwarder does not take any responsibility for:
 - a. If any exhibits is not allowed by the organizer or Chinese Customs to be sold or displayed in fair site.
 - b. Any tax /duty for sold exhibits.
16. Any service required from exhibitors not covered by tariff should be notified official forwarder in advance, quotation will be given upon request.
17. This tariff is compiled on volume or weight basis and have no correlation with the value of exhibits, thus no insurance coverage is included. Insurance coverage is subject to separate quotation.
18. All transactions are subject to the company' s standard trading conditions (copies available on request from the company)and which in certain cases, exclude or limit the company's liability.

APPENDIX 4

Acknowledgement of Customs Clearance Formalities

Dear Exhibitor,

Canton Fair Exhibition Design & Construction Co., Ltd. as the general transport agent of this exhibition, is honored to provide you with transport and customs clearance services related to exhibits. As your exhibits from overseas entering China are temporary imported goods, the goods are subject to strict supervision by the Chinese authorities after import. Therefore, please strictly comply with the following rules to avoid recruitment delays or losses.

A) Return of Exhibits

Please provide disposal instructions for all of your exhibits, regardless of disposal nature, to before the closing of exhibition. For any emergency needs in return shipments, your instructions MUST reach our company BEFORE the opening of exhibition.

B) Sold

Without prior approval of the Chinese Authorities, exhibits are prohibited from being sold by retail to visitors on spot. Any sales, irrespective of value, is mandatory to go through official procedures packed and returned to the customs bonded warehouse after the fair pending till the completion of import formalities, and clearance of tax and duties, local transportation, as well as bonded warehouse storage charges by the exhibitor, buyer or official importer.

C) Consumed Exhibits

Promotional Materials: Publicities, Souvenirs, Samples, Visual Aids, or etc.

If exhibitors plan to use audio-visual materials or distribute promotional items at the exhibition venue, they must clearly list them on the temporary import declaration form. Please send all audio-visual materials (CDs, video tapes, photos, maps, etc.) and two copies of each promotional item (such as brochures, leaflets, souvenirs, samples, etc.) by express delivery to our company (address as follows) for customs review before the deadline on the schedule. The review process takes approximately three to four working days. The authorities will determine the tax amount based on the type, value and quantity of the products. To avoid delays, exhibitors are advised to apply to their domestic freight forwarders as soon as possible.

D) Give-away to Domestic Company

Give-away items means the exhibitor provides its agent, sub-company, and corporate partners in PR China with its exhibits free for the purpose of business development. The clearance procedures are same as Sold exhibits packed and returned to the customs bonded warehouse after the fair pending till the completion of import formalities, and clearance of tax and duties, local transportation, as well as bonded warehouse storage charges by the exhibitor, receiver or official importer.

E) Abandoned Exhibits

Under the Customs' rules and regulations, no abandoned exhibits are allowed to be disposed by exhibitor's own arrangement. They must be re-packed and handed over to the Customs' disposal via. Waste treatment charges, storage, and related charges are at the exhibitor's account. It is also subject to the Authorities' approval for abandoned that the earlier submission of your declaration of abandoned exhibits, the more storage charges you could save. You are suggested to submit your declaration to before the opening of the fair. Despite of abandoned exhibits, any violation of these official rules and regulations will also drag you into the possibilities of fine and penalties. After the submission of declaration, no change is accepted by the Authorities.

For further information and queries, please do not hesitate to contact us.

Wish you have every success in the exhibition!

APPENDIX 5

Acknowledgement of Quarantine Inspection and Fumigation Formalities

Wooden Materials

With effect from 1 January 2006, all exhibits containing wood materials (inner or outer packaging) or wood filling, as well as wood chips and sticks, must be treated under the heat treatment (HT) or methyl bromide fumigation (MB) procedures approved by the relevant Chinese authorities before entering the territory of China. And on both sides of the wood packaging material branded with the "IPPC" International Plant Protection Convention organization special logo (see the attached notice for details). Exhibitors are required to submit a Wood Fumigation Certificate (approved Heat Treatment/Fumigation Certificate) to the Chinese authorities as proof. However, the authorities will still conduct a comprehensive quarantine of inbound goods and verify that all goods are in good condition before they are released. If the authorities deem it problematic, it may be mandatory to re-fumigate the exhibits in China, at the exhibitor's expense. In other words, the "IPPC" mark and the wooden fumigation certificate are not the final standard, and the quarantine officials reserve the right to make the final decision. If the exhibits cannot be displayed in the exhibition in time due to wood fumigation again, our company is exempted from liability. This clause applies to all import countries, cities and regions (including Hong Kong, Macau and Taiwan).

The authorities have imposed a comprehensive quarantine on all incoming exhibits and severely punished violators. Exhibitors are requested to handle fumigation matters carefully to avoid delays and losses.

Used Stuffing and Packing Materials

The Chinese authorities strictly prohibit the use of imported exhibits as used materials for filling the packaging, such as newspapers, wrapping paper, paper scraps, bubble wrap, etc., in China, and violators will be punished by the Chinese authorities.

Exhibitors are required to take all the fillers imported into the country in their original boxes in the form of return shipments or hand carrying after the end of the exhibition, regardless of whether they sell, return or abandon the exhibits, and exhibitors are strictly prohibited from disposing of the packaging materials as if they were in China in the form of payment. For example, if the exhibits are sold, the exhibits can be left for general import trade procedures, but the original filling in the box must leave the country.

Based on this special situation, exhibitors are advised to prepare some new fillers and packaging materials to enter the country with the exhibits in case of emergency.

Meat, Dairy Products, Produce, Plants

In view of the strict management of the import of food, beverages, meat, dairy products, agricultural products and plants by the customs and inspection and quarantine departments, special import license documents are required for import. Usually these permits are applied for for large commercial items and are complicated, time-consuming and costly. Therefore, exhibitors are advised not to ship such items with the goods. Failure to do so may result in late delivery and additional costs. If exhibitors must ship such items, please confirm that they have a valid certificate of origin and an official health certificate, and ship such goods separately. Please be sure to contact us one month before our delivery date in order to consult with the relevant authorities and apply for the relevant license documents. Please do not arrange delivery without our company's confirmation. Any costs incurred will be quoted separately.

China Foreign Trade Guangzhou Exhibition Co., Ltd

Contact: Miss Pei/Mr. Zhou

Telephone: (86) 2089128036/89128035

Fax: (86) 2089128222-8113

E-mail: Peij@fairwindow.com.cn/zhoush@cfte.com

Publication advertising content and subscription

1.The content of the advertisement and subscription of the "Journal".

The journal is the official publication designated by the exhibition, which has a large circulation, strong pertinence, detailed content and complete information, and is an effective procurement guide for domestic and foreign buyers, and is collected by a large number of buyers and used as a dictionary of procurement guidelines, with a long-term advertising effect.

There are many forms of advertising in the journal, and exhibitors can carry out different placements according to their own promotion priorities, and it is recommended that exhibitors do extensive and comprehensive publicity for their company, brand image and main products in the journal.

Precautions:

a.Catalogue size: 143mm (width) × 208mm (height)

b.Advertising size: 143mm (width) × 208mm (height), with 3mm bleeding space reserved

c.Delivery standard: The electronic version is provided by the exhibitor itself (in jpg or tiff or ai format, CMYK four colors, pixel requirements of 300dpi or above) or the exhibitor provides advertising film to Guangzhou Huakan Exhibition Service Co., Ltd.

d.The relevant fee is only the cost of advertising in the catalogue, the advertising film is provided by the exhibitors themselves, if you need to be filmed by Guangzhou Huakan Exhibition Service Co., Ltd., an additional fee of RMB200/edition of the film will be charged.

e.Please provide film tablets to Guangzhou Huakan Exhibition Service Co., Ltd. before February 15, 2026, mailing address: Shop 110, Building 3, Binhai Yucheng, No. 140, Haixiang Street, Nansha District, Guangzhou.

2. "Catalogue", "Visitor Guide" and the LOGO of the booth guide plan in the exhibition hall are solicited

With the continuous development of the economy, consumers' demand for brand consumption is increasing, and buyers hope to cooperate with enterprises with brand influence for a long time. Logo (LOGO) as a symbolic logo of the enterprise or brand, is an important part of the brand image promotion, during the exhibition, the scene through a large number of distribution of "journal", "visitor guide" and other publicity media, as well as the exhibition hall set up a number of booth guide maps, convenient buyers and visitors to quickly find their own concern of the enterprise, exhibitors choose to publish the enterprise or brand logo (LOGO), can be a good expansion of the promotion of corporate image, and let buyers and visitors quickly search for your booth.

3.Logo Locations and Forms

a.Logos in Exhibitors Directory of Catalogue (Black & White)

Location: Exhibitors Directory in catalogue (Arranged in numerical order of booth number) Expressive Form: Black & white logo and writing

Promotion Form: Black & white corporate or brand logo

Note: The Exhibitors Directory in the catalogue arranges the information about all exhibitors in numerical order of booth number. Logo advertising in the catalogue can promote brand and attract the attention of buyers to your company information.

Chapter 7

**China Foreign Trade Guangzhou
Exhibition Co., Ltd.**

**Regulations on Penalties for
Exhibition Construction Management**

China Foreign Trade Guangzhou Exhibition Co., Ltd.

Regulations on Penalties for Exhibition Construction Management

Chapter I General Provisions

Article 1 These Regulations are formulated in accordance with the principle of "whoever hosts is responsible" for exhibition safety as stipulated in the "Regulations on the Safety Administration of Large-Scale Mass Activities" (Decree No. 505 of the State Council) and in combination with the actual situation of China Foreign Trade Guangzhou Exhibition Co., Ltd. (hereinafter referred to as "CFTE"). The purpose is to ensure on-site production safety during exhibitions, protect the safety of people's lives and national property, standardize on-site exhibition management, rectify exhibition order, effectively curb potential safety hazards, and severely handle safety accidents.

Article 2 These Regulations shall apply to construction units (hereinafter referred to as "construction units") that are entrusted by CFTE, exhibitors who have confirmed CFTE's exhibition participation regulations, or any practitioners in the exhibition to engage in booth construction or environmental layout projects at the exhibition sites hosted or co-hosted by CFTE in China.

Chapter II Detailed Rules for Penalties for Safety Accidents and Other Violations

➤ Section I Booth Structural Safety

Article 3 If a construction unit causes a fatal accident due to its construction and/or the constructed project during the exhibition, its construction qualification shall be revoked. Based on the handling opinions or accident investigation reports issued by relevant government departments and the settlement and compensation status of the special decoration construction enterprise, at least RMB 100,000 (all amounts below are in RMB) of the Construction Safety Deposit (hereinafter referred to as "Deposit") shall be deducted. In serious cases, the full amount of the Safety Deposit shall be deducted. The construction unit shall bear all economic and legal responsibilities arising from the accident. The construction unit shall be included in the blacklist and shall never directly or indirectly engage in on-site booth construction or environmental layout projects for all exhibitions hosted or co-hosted by CFTE in China.

Article 4 If a booth collapses during the exhibition, the construction unit's construction qualification shall be revoked, RMB 50,000 of the Deposit shall be deducted each time, and the construction unit shall not directly or indirectly engage in on-site booth construction or environmental layout projects for all exhibitions hosted or co-hosted by CFTE in China within three years.

If a person is injured due to illegal construction of a booth during the exhibition, RMB 20,000 to RMB 50,000 of the Deposit shall be deducted for each serious injury, with 20 points deducted each time; RMB 3,000 to RMB 10,000 of the Deposit shall be deducted for each minor injury, with 10 points deducted each time. For specific penalty standards, refer to the attached "Table of Classification of Construction Injury Severity and Penalty Measures".

Article 5 Construction units must conduct special reinforcement treatment on crossbeams of booths with a span exceeding 6 meters (including 6 meters). If a booth with potential structural safety hazards fails to be rectified and improved: for each crossbeam or stress point not reinforced, RMB 10,000 of the Deposit shall be deducted with 5 points deducted; for each fallen crossbeam or ornament, RMB 15,000 of the Deposit shall be deducted with 5 points deducted.

Article 6 If a booth exceeds the height and width limits specified in the exhibitor manual of the exhibition and fails to be rectified within the specified time limit, in addition to ordering the suspension of construction, RMB 10,000 of the Deposit shall be deducted each time with 5 points deducted.

Article 7 Construction units must obtain the approval opinion of the exhibition's main contractor (the unit entrusted and managed by CFTE to directly conduct on-site specific management of construction units) on the special decoration (hereinafter referred to as "special decoration") construction plan before entering the venue. If the special decoration construction is not approved, RMB 10,000 of the Deposit shall be deducted each time with 5 points deducted.

Article 8 For booth decorations involving glass materials, the thickness of glass materials shall not be less than 8mm for tempered glass; for glass materials exceeding 2 meters in height, the thickness shall not be less than 12mm for tempered glass and must be pasted with explosion-proof film; the area of a single glass piece shall not exceed 3m²; obvious safety warning signs shall be pasted when a large area of glass is used. Any violation of the

above provisions shall result in a deduction of RMB 10,000 of the Deposit per item with 5 points deducted.

Article 9 If a construction unit fails to construct in accordance with the declared drawing specifications or constructs according to unapproved drawings, RMB 10,000 of the Deposit shall be deducted with 5 points deducted.

Article 10 For non-functional "fake second-floor" booths, the construction unit of each illegal booth shall be deducted RMB 50,000 of the Deposit. Depending on the severity of the circumstances, its construction qualification may be suspended or revoked with 10 points deducted.

Article 11 It is strictly prohibited to split booths for construction. Construction units must construct strictly in accordance with the drawings. For illegal construction by splitting booths, RMB 5,000 to RMB 50,000 of the Deposit shall be deducted depending on the severity of the circumstances, and the construction qualification may be suspended or revoked with 2-10 points deducted.

Section II Public Security and Fire Safety

Article 12 If a fire is caused due to violation of fire safety requirements during the exhibition, the construction unit shall be included in the blacklist and shall never directly or indirectly engage in on-site booth construction or environmental layout projects for all exhibitions hosted or co-hosted by CFTE in China. Based on the handling opinions or accident investigation reports issued by relevant government departments and the settlement and compensation status of the special decoration construction enterprise, at least RMB 100,000 of the Safety Deposit shall be deducted. In serious cases, the full amount of the Safety Deposit shall be deducted, and the construction unit shall compensate CFTE for all losses and bear all economic and legal responsibilities arising from the accident.

Article 13 If a fire alarm is triggered due to violation of fire safety requirements during the exhibition, RMB 50,000 of the Deposit shall be deducted, the construction qualification shall be revoked for two years, and the construction unit shall bear all economic and legal responsibilities arising from the accident.

Article 14 The combustion performance grade of exhibition and construction materials used in booths (such as carpets, plates, etc., excluding exhibits) shall not be lower than Grade B1 (flame-retardant). If violated, the Deposit shall be deducted according to the following standards: for booths with an area of less than 150 square meters (excluding 150 square meters), RMB 1,000 shall be deducted per booth; for booths with an area of 150 square meters to less than 400 square meters, RMB 3,000 shall be deducted per booth; for booths with an area of 400 square meters or more (including 400 square meters), RMB 5,000 shall be deducted per booth. 2 points shall be deducted for each violation mentioned above.

Article 15 During the exhibition, combustible materials (such as combustible packaging materials, combustible plates, etc.) shall not be stored in temporary warehouses. If violated, RMB 5,000 of the Deposit shall be deducted with 2 points deducted.

Article 16 During the exhibition, if a construction unit conducts illegal hot work (such as electric welding, electric cutting, etc.) on the exhibition site or illegally uses flammable and explosive materials (such as gasoline, kerosene, etc.) during construction, RMB 5,000 of the Deposit shall be deducted each time with 2 points deducted.

Article 17 If the opening of a booth's fire hydrant is blocked, the fire passage is obstructed, insufficient fire-fighting equipment is equipped as required, or the exhibition hall's fire-fighting facilities and equipment are arbitrarily embezzled, damaged, shielded, sealed, dismantled, or deactivated, RMB 10,000 of the Deposit shall be deducted each time with 3 points deducted.

Article 18 Anyone who takes exhibition hall fire-fighting equipment out of the venue shall have RMB 10,000 of the Deposit deducted each time with 3 points deducted and shall be handed over to the public security organ for handling.

Article 19 If the staff of a construction unit engage in fighting or gathering to make trouble in the exhibition hall, RMB 30,000 of the Deposit shall be deducted each time with 10 points deducted.

Article 20 If a construction unit suspends services midway due to disputes with customers, causing adverse effects on the exhibition's image, RMB 50,000 of the Deposit shall be deducted, and the construction qualification shall be revoked for two years.

Article 21 If a labor dispute arises due to arrears of workers' wages and medical expenses, causing adverse effects on the exhibition's image, RMB 50,000 of the Deposit shall be deducted, and the construction qualification shall be revoked for two years.

Article 22 If a construction unit plagiarizes or embezzles the design plan of another company, RMB 5,000 of

the Deposit shall be deducted each time, and the unit shall compensate the other party for losses with 5 points deducted each time.

Article 23 All booths shall be equipped with annually inspected and qualified fire extinguishers. In strict accordance with fire safety regulations, each exhibition platform must be equipped with qualified and effective fire extinguishers (single unit $\geq 2\text{kg}$) at the standard of 1 extinguisher per 20m^2 and 2 extinguishers per 50m^2 . If violated, RMB 5,000 of the Deposit shall be deducted with 2 points deducted.

➤ Section III Construction Safety

Article 24 Special operation personnel of construction units must hold valid certificates to work. If violated, in addition to ordering immediate rectification, RMB 1,000 of the Deposit shall be deducted per person each time with 2 points deducted.

Article 25 Construction personnel must wear safety helmets when working off the ground and fasten safety belts when engaging in high-altitude operations. If violated, in addition to ordering immediate rectification, RMB 500 of the Deposit shall be deducted per person each time with 1 point deducted.

Article 26 Operating tools such as ladders and scaffolding used at the construction site must be firm, and joints must be rigidly anchored. When using the above tools for operation, 1-2 construction personnel shall be assigned to stand by around the tools to ensure the safety of the operators. Wooden ladders shall not be used; no objects shall be placed or people shall stand on the top of mobile elevated tools; construction personnel around ladders, scaffolding and other operating tools shall not leave their posts without permission. If violated, in addition to ordering immediate rectification, RMB 1,000 of the Deposit shall be deducted per person each time with 2 points deducted.

Article 27 Construction units shall not bring cutting machines or welding machines into the venue for operation without permission. If violated, RMB 10,000 of the Deposit shall be deducted each time with 5 points deducted.

Article 28 During the exhibition dismantling period, special decoration construction units that conduct barbaric dismantling or violent demolition, including but not limited to: 1. Pushing or pulling down the entire exhibition platform; 2. Pushing or pulling down the exhibition platform structure onto the passage after the basic cleaning of the booth; 3. Pushing or pulling down part of the exhibition platform structure when there are personnel working in or beside the booth, shall be deemed as barbaric dismantling or violent demolition. Based on on-site videos or pictures, RMB 2,000 to RMB 10,000 of the Deposit shall be deducted each time depending on the severity of the circumstances with 3 points deducted.

Chapter III On-Site Management

➤ Section I Electricity Management

Article 29 If a construction unit fails to design and install power distribution lines in accordance with regulations and standards, resulting in personal injury or death or property loss due to illegal electrical operations, its construction qualification shall be revoked. Based on the handling opinions or accident investigation reports issued by relevant government departments and the settlement and compensation status of the special decoration construction enterprise, at least RMB 100,000 of the Safety Deposit shall be deducted. In serious cases, the full amount of the Safety Deposit shall be deducted, and the construction unit shall compensate CFTE for all losses and bear all economic and legal responsibilities arising from the accident. In addition, the construction unit shall be included in the blacklist and shall never directly or indirectly engage in on-site booth construction or environmental layout projects for all exhibitions hosted or co-hosted by CFTE in China.

Article 30 If illegal installation causes a power outage in the exhibition hall, RMB 30,000 of the Deposit shall be deducted, the construction unit shall compensate for all losses caused by the accident, and the construction qualification shall be revoked for two years.

Article 31 The power connection of all electricity-consuming units must be carried out in strict accordance with the national "Electrical Safety Specifications". No smoke or fire accidents shall occur at any time. The use of aging lamps, electrical boxes, or aging on-site booth circuits and power materials (sparks, smoke, pungent odors, minor fires, lamp falling) shall result in a deduction of RMB 5,000 per occurrence with 3 points deducted. In serious cases, the construction unit shall bear all economic and legal responsibilities arising from the accident.

Article 32 If the declared electrical load and electrical nature are false or concealed, RMB 3,000 of the Deposit shall be deducted each time with 3 points deducted.

Article 33 Electrical lines must use flame-retardant cables and insulated sheathed wires. If violated, RMB 2,000 of the Deposit shall be deducted with 2 points deducted.

Article 34 When connecting branch electrical lines, insulation tape shall not be used for direct wrapping;

insulation ceramic or plastic joints must be used for connection, and insulation protection measures shall be taken. If violated, RMB 2,000 of the Deposit shall be deducted each time with 3 points deducted.

Article 35 Concealed electrical lines must be protected by threading pipes; when laid along the ground across passages, they shall be protected by bridge plates or other methods. If violated, RMB 2,000 of the Deposit shall be deducted with 3 points deducted.

Article 36 Metal components in booths must adopt grounding protection measures, and 30mA leakage protection devices shall be installed at the terminals of electrical equipment control switches. If violated, RMB 2,000 of the Deposit shall be deducted with 3 points deducted.

Article 37 When high-temperature electrical components and electrical equipment are close to materials with non-Class A (non-combustible) combustion performance, heat insulation, heat dissipation and other protection measures shall be taken; the distance between various lamps and combustible materials shall not be less than 0.5m. If violated, RMB 2,000 of the Deposit shall be deducted with 2 points deducted.

Article 38 During the exhibition, no power connection equipment such as cable connection sockets or distribution boxes shall be installed in the temporary warehouses of booths for power supply. If violated, RMB 2,000 of the Deposit shall be deducted with 2 points deducted.

Article 39 Without prior declaration and approval by the exhibition hall, arbitrarily pulling and connecting the exhibition hall's power supply shall result in a deduction of RMB 5,000 of the Deposit each time with 3 points deducted.

Article 40 When constructing a booth, concealing, blocking, or failing to expose the distribution box. If inspected and failing to rectify as required, RMB 3,000 of the Deposit shall be deducted each time with 2 points deducted.

Article 41 When constructing a booth, advertising light boxes without opening holes for heat dissipation. If inspected and failing to rectify as required, RMB 3,000 of the Deposit shall be deducted each time with 2 points deducted.

➤ Section II On-Site Order

Article 42 Construction units may enter the exhibition hall for construction in advance only after approval and completing relevant payment procedures as required. Arbitrarily entering the venue in advance or making false declarations shall result in a deduction of RMB 5,000 of the Deposit each time, and the corresponding fees shall be paid in accordance with regulations with 2 points deducted.

Article 43 When entering or exiting the construction site, construction personnel shall take the initiative to wear certificates and obey the inspection of relevant personnel; they shall not alter, copy, or transfer certificates. If violated, RMB 500 of the Deposit shall be deducted each time with 1 point deducted.

Article 44 Posting advertisements or notices randomly in the exhibition hall is prohibited. If inspected and failing to rectify as required, RMB 1,000 of the Deposit shall be deducted each time with 2 points deducted.

Article 45 The exposed backboards of special decoration booths must be beautified. If inspected and failing to rectify as required, RMB 5,000 of the Deposit shall be deducted each time with 2 points deducted.

Article 46 Arbitrarily carrying out any construction on the exhibition hall's facilities (including but not limited to ceiling suspension, modification, hanging, nailing, pulling, drilling, etc.) shall result in a deduction of RMB 5,000 of the Deposit each time with 2 points deducted. The construction unit shall also compensate the exhibition hall for all losses caused by the illegal construction and shall be handed over to the public security organ for handling.

Article 47 Arbitrarily modifying standard booths shall result in a deduction of RMB 2,000 of the Deposit each time with 2 points deducted.

Article 48 During the exhibition dismantling period, special decoration waste must be directly transported away or piled up at the designated stacking point and cleaned up within the specified time. Failure to evacuate the exhibition hall within the specified time shall result in a deduction of RMB 50 per square meter of the Deposit based on the booth area, with 2 points deducted per booth.

Article 49 After the exhibition hall is closed, if the dismantled materials are not evacuated from the exhibition hall area (including parking lots, outdoor passages of the exhibition hall, and roads outside the exhibition hall) beyond the time limit (more than 5 hours after the exhibition hall is closed), RMB 5,000 of the Deposit shall be deducted each time with 2 points deducted.

Article 50 After receiving a rectification notice, the construction unit must rectify and improve within the specified time. If refusing to sign for the rectification notice or failing to cooperate with the work, in addition to

deducting the corresponding violation fees, RMB 5,000 of the Deposit shall be deducted each time with 2 points deducted.

Article 51 When constructing on-site, construction units must comply with the relevant management measures of national/local government departments and administrative agencies. If violated, RMB 5,000 of the Deposit shall be deducted each time, and the unit shall be transferred to the relevant government departments and administrative agencies for handling with 10 points deducted.

Article 52 During the China International Building Decoration Fair, if a construction unit arbitrarily installs any sound source amplification equipment (such as audio systems and loudspeakers) in the booth and refuses to remove it from the exhibition hall after repeated warnings, RMB 10,000 of the Deposit shall be deducted with 5 points deducted.

➤ Section III Others

Article 53 For other violations that affect structural, electrical, fire, construction and other safety as well as on-site construction management and order, after verification, corresponding deductions of the Deposit or suspension/cancellation of construction qualifications may be made with reference to the penalty standards for similar violations.

Chapter IV Explanations on Blacklist, Construction Deposit, and Point Deduction

Article 54 If any accident is caused due to the construction unit's reasons, the construction unit shall bear all legal responsibilities and be responsible for compensating all losses to the relevant units or individuals. The construction unit has no right to request the use of the Deposit for such loss compensation.

Article 55 Deduction of the full amount of the Deposit refers to deducting the full amount of the Deposit paid by the construction unit in accordance with the unified standard or deducting the Deposit of the accident booth paid by the construction unit based on the booth area. If a construction unit violates multiple penalty provisions of these Regulations, the total fine amount shall be the sum of the fines for multiple violations.

Article 56 If the deducted amount exceeds the Deposit paid by the construction unit, the construction unit must make up the full deducted amount on the same day in accordance with these Regulations. Otherwise, CFTE has the right to immediately suspend its construction, and all consequences and losses arising therefrom shall be borne by the construction unit.

Article 57 Each construction unit has a total of 100 points per contract cycle. After the end of each exhibition, the Exhibition Services Department shall count the points of all construction units. When the points are deducted to below 60, the qualification for the next exhibition shall be automatically revoked until the end of the contract cycle. The construction unit may submit a written application for renewal in the next contract cycle. For construction units whose qualifications are directly revoked due to other major violations, the revocation period shall be implemented, and the qualification may be restored only after submitting a written application upon the expiration of the revocation period.

Article 58 For the detailed operating rules of the above-mentioned "blacklist", refer to Annex 2, "Implementation Rules for the Blacklist Management of Special Decoration Qualified Construction Units".

Chapter V Supplementary Provisions

Article 59 Matters not covered in these Regulations shall be implemented in accordance with relevant national laws and regulations and the provisions of China Foreign Trade Center Group Co., Ltd.

Article 60 These Regulations are drafted by the Exhibition Services Department, which shall assume the management responsibility for these Regulations, be responsible for supervising the problems existing in the whole implementation process, and be responsible for interpretation. The Exhibition Services Department may propose revisions and adjustments to the existing problems on an annual basis, which shall be implemented only after being approved by the CFTE General Manager's Office Meeting.

Article 61 These Regulations shall come into force on the date of promulgation. In case of any conflict or inconsistency with these Regulations, these Regulations shall prevail.

Article 62 Explanations on the Entry into Force and Retroactivity of the Initial and Revised Contents.(1) The initial document number and initial promulgation time of these Regulations are the initial constraints on the relevant work content. With the passage of time, the revision and improvement of national laws and regulations and higher-level management provisions, and changes in the enterprise's actual situation, these Regulations will be continuously revised. Each revised content shall come into force on the date of revision.(2) The previous revised versions of these Regulations shall be kept in the General Office and the interpreting department respectively. If it is necessary to trace the historical implementation situation, the interpreting department shall be responsible for issuing a situation explanation and putting forward corresponding handling opinions.
